Aprašymas

CE-ZM1902M-SV Slow Juicer (silver)

The CE-ZM1902M-SV slow juicer in silver features a wide 118 mm feed chute, Hands-Free technology with automatic feeding and cutting of ingredients, and a powerful, high-torque pure copper motor. The appliance can handle up to 4.5 kg of hard carrots without jamming, offers a reverse function, quiet operation, and the ability to prepare juices, plant-based milk, and desserts. Its compact dimensions (approx. 41.5 × 18 × 14.7 cm) make it easy to place on a countertop, and the included containers with 700 ml capacity enhance convenience.

Wide feed chute and Hands-Free technology

The 118 mm diameter chute allows you to feed whole fruits and vegetables without pre-cutting. Combined with the automatic cutting and feeding system, this means significantly less work on your part. In practice, all you need to do is load the ingredients and close the lid, and the device will take care of the rest on its own, which works especially well with larger portions.

Performance proven in practice

The pure copper motor delivers high torque, ensuring the juicer operates smoothly even with hard ingredients. The design has been tested for performance—the device can process up to 4.5 kg of carrots without a drop in power and without the risk of overheating. This translates to stable operation and a greater yield of juice from each batch of produce.

Reverse function - uninterrupted operation

The ability to reverse the rotation direction allows you to quickly clear any clogs. This means you don't have to stop the machine or take it apart, which increases convenience and reduces the time needed to prepare drinks.

Quiet operation every day

Slow-speed technology reduces noise levels, making the juicer ideal for use both in the morning and in the evening. Less noise goes hand in hand with a more comfortable user experience, especially in a home setting.

3-in-1 device - more possibilities

The juicer isn't limited to just one use. Thanks to its design, it allows you to prepare various products with different consistencies. You can easily prepare clear fruit and vegetable juices, creamy plant-based milks (such as almond or oat milk), as well as thick sorbets and homemade ice cream from frozen fruit. This means that a single appliance can replace several others in the kitchen.

Easy cleaning and safe materials

The juicer's components can be quickly disassembled, making them easy to clean after use. Food-safe, BPA-free materials enhance safety and allow you to use the device daily without worrying about the quality of your drinks.

Included

- CE-ZM1902M-SV slow juicer
- Juice container
- Pulp container
- Ingredient pusher

Manufacturer	AMZCHEF
Model	CE-ZM1902M-SV
