Aprašymas

AMZCHEF CE-ZM1902B-SV Slow Juicer

The AMZCHEF CE-ZM1902B-SV slow juicer features a large 142 mm feed chute, three filtration levels (coarse, fine, ultra-fine), a reverse rotation function, and a pure copper motor. The device can handle large quantities of ingredients—the manufacturer claims it can juice up to approx. 4.5 kg of carrots without jamming. With a height of approx. 41 cm and an included juice container holding up to 700 ml, the appliance works well for everyday use.

Large feed chute and more convenient ingredient preparation

The 142 mm wide feed chute allows you to insert larger pieces of fruit and vegetables, and in many cases, whole produce. This reduces the time needed for cutting before juicing. The set includes a pusher that helps you safely and effectively press down on ingredients when needed.

Customizable juice consistency

Three filtration settings let you choose between clearer juice and a thicker consistency with more pulp. In practice, this allows you to better tailor the result to the type of ingredients and your personal preferences, without having to change the machine.

Reverse function in practice

The ability to reverse the rotation helps in situations where ingredients get stuck in the mechanism. This feature makes it easier to unclog the auger without having to disassemble the juicer, which streamlines the process, especially with harder or fibrous produce.

Performance and motor operation

The copper-wound motor ensures stable operation of the device with various types of ingredients. The manufacturer notes that the juicer is capable of processing larger quantities, e.g., up to several kilograms of carrots, without downtime caused by clogging.

Practical details for everyday use

The juicer is equipped with a juice container marked up to 700 ml, making it easy to monitor the amount of juice produced. The juice outlet features a closable flap that helps minimize dripping after use and keeps the countertop clean.

Design and cleaning

The device's components are removable, allowing them to be washed after use. The design is based on standard solutions used in slow juicers, so cleaning does not require specialized steps, though—as with this type of equipment—it takes a moment after each use.

Included

- CE-ZM1902B-SV slow juicer
- 700 ml juice container
- Pulp container
- Ingredient pusher

Manufacturer	AMZCHEF
Model	CE-ZM1902B-SV
Device type	Slow juicer (cold press)
Feed chute	142 mm
Capacity	up to approx. 4.5 kg of carrots without jamming
Filtration system	3 levels: coarse, fine, ultra-fine (very fine)
Device dimensions	41.4 x 17.8 x 14.5 cm

Gross weight: 3870, Net weight: 3450, Box length: 38,00, Box width: 19,00, Box height: 34,00, Last delivery: 20.10.2026, GPSR Link: https://psr-assets.innpro.pl/small_appliances/sg_small_appliances_kitchen_accessories.pdf
