Aprašymas

AMZCHEF CE-SJ-036C-GA Slow Juicer

The AMZCHEF CE-SJ-036C-GA slow juicer combines a large 2.5-liter capacity, a 165 mm feed chute, and a 250 W pure copper motor, allowing you to conveniently prepare fresh juices without the time-consuming task of chopping ingredients. Automatic cutting and slow cold-pressing technology process the ingredients placed in the chamber, and the claimed juice extraction efficiency reaches 99.6%. The model also offers much more than just classic juicing—its 3-in-1 design also allows you to prepare sorbets as well as oat and nut-based beverages.

Large feed chute and a capacity of up to 2.5 L

The feed chute, which is 165 mm wide, accommodates whole fruits and vegetables, reducing the need to cut them into small pieces beforehand. The large 2.5-liter chamber allows you to load a larger batch of ingredients at once, while the self-feeding and automatic cutting system takes care of the rest. This solution saves time both during ingredient preparation and the juicing process itself.

Automatic Cutting and Slow Cold Pressing

Auto-Cutting & Cold Press technology combines automatic chopping of ingredients with slow cold pressing. The integrated design sequentially handles cutting, juicing, filtering, and dispensing the finished juice, which simplifies the entire process and minimizes mess during operation. This solution also reduces the risk of the mechanism clogging, helps produce juice with less pulp, and shortens the time needed to prepare it.

3-stage filtration - smoother texture

The three-layer microfilter thoroughly separates the pulp during juicing, with pore sizes of 2 mm, 0.8 mm, and 0.5 mm. Each filtration stage is designed to trap larger particles, minimize clogging, and further purify the liquid. The system removes up to 99% of the pulp, resulting in smoother juice with fewer fruit and vegetable particles in the container.

Get the Most Out of Your Ingredients

The AMZCHEF CE-SJ-036C-GA achieves a claimed juice extraction rate of 99.6%, allowing you to make the most of your ingredients. Combined with automatic cutting, slow juicing, and 3-stage filtration, the device efficiently handles the entire process—from loading the produce to separating the liquid from the pulp. This is a convenient solution when you want to make the most of your fruits and vegetables while achieving a uniform consistency.

250 W Pure Copper Motor—Efficient Operation Even with Hard Ingredients

The pure copper motor delivers 250 W of power and can process even hard fruits and vegetables. The juicer handles carrots, for example, with ease—without stalling or clogging the mechanism. At the same time, the device’s noise level is only about 50 dB, so juicing doesn’t have to be accompanied by annoying noise.

3-in-1 appliance—make juices, sorbets, and plant-based beverages

The CE-SJ-036C-GA model allows you to prepare not only delicious juices, but also sorbets with a smooth texture and plant-based beverages, such as those made from oats or nuts. This means you can successfully use a single appliance for a variety of tasks! For example, oat milk can be made without additives, preserving its natural plant-based ingredients—a great option for people with lactose intolerance.

Safe and Smooth Operation

If ingredients start to clog the juicing mechanism, the Auto-Reverse function automatically activates reverse rotation, helping to clear the blockage and restore smooth operation. The juicer also protects the motor from overheating and stops immediately when the lid is opened, enhancing safety during use. An additional lock ensures the device can only be started once all its components are properly assembled.

Simple Assembly and Easier Cleaning

Preparing the appliance for use involves three steps: placing the bowl on the base, inserting the juicing auger into the central slot, and then fitting the feed chute and turning it clockwise until it locks into place. Once you’re done, the individual parts can be quickly disassembled, making it easier to clean them thoroughly. Additionally, the removable pulp outlet provides easier access to any remaining residue.

Manufacturer	AMZCHEF
Model	CE-SJ-036C-GA
Type	Slow juicer
Voltage	220-240 V~, 50-60 Hz
Power	250 W
Motor material	Pure copper
Maximum continuous operating time	≤10 min
Minimum rest period	≥10 min
Chamber capacity	2.5 L
Feed chute width	165 mm
Technology	Cold pressing
Pre-chopping system	Yes
Filter	Three-layer microfilter
Filter pore sizes	2 mm / 0.8 mm / 0.5 mm
Functions	Juicing, making oat and nut drinks, making sorbets

Auto-Reverse function	Yes
Overheating protection	Yes
Automatic shut-off when the lid is opened	Yes
Safety lock	Yes
Removable pulp outlet	Yes
Noise level	Approx. 50 dB
Dimensions	19.95 × 20.84 × 43.88 cm

PPWR: <https://ppwr.innpro.pl/en/amzchef>, Gross weight: 4590, Net weight: 4000, Box length: 43,50, Box width: 34,00, Box height: 18,50

Techninė specifikacija

Matmenys ir svoris

Matmenys (I × P × A)	43,00cm × 34,00cm × 18,00cm
Svoris	4,59kg
