Aprašymas

MOVA IG20 Pro Electric Grill

MOVA IG20 Pro is a smart, multifunctional electric grill that combines the capabilities of a fat-free fryer and a griddle cooktop. With it, you can prepare everything from juicy steaks and crispy fries to grilled vegetables, fish or desserts with up to 80% less fat. The unit offers eight automatic programs, a dual heating system and precise NTC sensors that control temperatures up to 260°C. A removable lid allows the equipment to be transformed into a multicooker for steaming, braising or roasting.

Versatility that replaces several appliances

The MOVA IG20 Pro Grill is like a cooking center for frying, grilling, baking and fat-free cooking. The large work surface (14x9 inches) holds up to six steaks or a full meal for the whole family, and the flat griddle cooktop is perfect for pancakes, vegetables and snacks. The fat-free fryer mode guarantees golden crispness with up to 80% less fat compared to traditional frying. Whether you want to prepare a quick lunch, dinner for guests or a healthy post-workout meal, the MOVA IG20 Pro will always deliver a perfect result.

Cooking with AI precision

The device uses advanced artificial intelligence algorithms that analyze the temperature and amount of ingredients to automatically adjust the time and intensity of heating. Eight smart programs let you prepare your favorite foods with a single touch - always with the perfect texture, flavor and degree of doneness. The AI system eliminates the risk of burning or undercooking, and every dish comes out perfect the first time.

Precise heating and even results

A dual heating system with 1775 watts (top) and 1300 watts (bottom) ensures even heat distribution on both sides of the dish - without turning it. The cyclonic circulation of hot air guarantees fast and thorough roasting, and with temperatures up to 260°C, the appliance is perfect for intense browning and sealing juices in meat. Integrated NTC sensors continuously monitor and regulate the temperature, maintaining ideal conditions for each type of food. This ensures that every bite is evenly baked, crispy on the outside and juicy on the inside.

Full real-time control

The MOVA IG20 Pro allows you to conveniently monitor the cooking process thanks to a wide viewing window on the front and two 40-watt lamps. You can watch the progress without the need to open the lid and lose heat, ensuring stable temperatures and even results. A built-in precision thermometer allows you to set the target temperature inside the dish - the unit will automatically stop when the perfect degree of baking is reached. Whether you prefer a bloody steak or well-fried meat, each dish will be prepared exactly the way you like it.
