Aprašymas

AMZCHEF CE-LS-GC02C-H-WP Electric Grill

The AMZCHEF CE-LS-GC02C-H-WP electric grill is a 2000 W appliance equipped with two nonstick grill plates measuring 32 × 22 cm. The appliance offers temperature control ranging from 80–230°C, a timer adjustable from 30 seconds to 60 minutes, and a clear LED display where you can monitor the selected settings. The ability to use both plates simultaneously or just the top or bottom plate allows you to tailor the heating method to the dish you're preparing, and the 180°-opening design increases the available cooking surface.

2000 W power and precise temperature control

The 2000 W power allows the set temperature to be reached quickly and ensures fast and even heating of the grilling surfaces. The temperature range from 80 to 230°C makes it easy to select the right conditions for various foods—from bread and vegetables to meat, burgers, and skewers. The built-in timer allows you to set the operating time from 30 seconds to 60 minutes, making it easier to control the entire food preparation process.

Contact grill or large surface area when unfolded

The AMZCHEF CE-LS-GC02C-H-WP can function as a classic contact grill, heating food from both the top and bottom simultaneously. The appliance can also be opened up to 180°, creating more space to prepare several items at the same time. The 32 × 22 cm plates are ideal for grilling steaks, sausages, vegetables, bacon, sandwiches, and skewers, among other items.

Adjustable height of the upper plate

The design of the grill's upper section allows you to adjust the distance between the plates to match the height of the food being prepared. The available settings of approximately 2, 4, and 7 cm make it easy to grill both thin ingredients and thicker burgers or tall sandwiches. As a result, the top plate does not need to press down hard on the food, which helps preserve its shape and provides greater flexibility when preparing various dishes.

Nonstick Coating and Easier Cleaning

The plates are coated with a nonstick finish that makes it easier to remove cooked food from the grill and reduces the time needed for cleanup afterward. Excess fat produced during cooking is drained into a removable tray, which helps keep the appliance and your countertop cleaner. The design also makes it easy to clean the grilling surfaces after use.

Cool-touch handle and sturdy finish

The grill's housing is made of stainless steel with a brushed finish, giving the appliance a simple, modern look that fits right in on your kitchen countertop. The handle is made of aluminum alloy and features a design that minimizes heat transfer, keeping it cooler to the touch while operating the appliance. This solution makes it more comfortable to open and close the top plate and reduces the risk of accidental burns during use.

Manufacturer	AMZCHEF
Model	CE-LS-GC02C-H-WP
Type	electric grill
Power Supply	220-240 V~, 50-60 Hz
Power	2000 W
Temperature Range	80-230°C
Timer	30 seconds to 60 minutes
Operating modes	both plates / top plate / bottom plate
Display	LED
Folding angle	up to 180°
Upper plate height adjustment	approx. 2 / 4 / 7 cm
Unit dimensions	33 × 35 × 17 cm
Plate dimensions	32 × 22 cm
Surface material	stainless steel
Handle material	aluminum alloy
Grill plate surface	nonstick coating
Surface finish	brushed
Grease tray	removable
