Durable data and power cable with extended service life is equipped with metal terminals, connectors with a nickel-plated surface and gold-plated contacts. Cable conductors are made of Tin-plated oxygen free copper. High-quality cable insulation, made of flexible TPE, guarantees maximum durability and also maintains sufficient flexibility. Thanks to the twisted and winding design, the cable takes up a minimum of space and is an ideal accessory for the car. In the shortened state, the cable is only 50 cm long and does not obstruct anywhere. When stretched, it comfortably reaches 110 cm away from the socket.

Power cables 22AWG (lower number = larger cross-section and lower wire resistance) guarantee fast charging of phones and other mobile devices. Cable also supports notebook charging using Power Delivery 60W technology. Data wires 30AWG together with high-quality shielding, ensure reliable data transmission. Double shielding protects transmitted signals from adverse interference.

Durable cable gland reduces dangerous cable bending. The mechanical resistance of the cable is also increased by the aluminum terminal covers.

• USB-C (M) male
• USB-C (M) male
