Aprašymas

MA3F Electronic Flight Control Modules R

Add a right-side EFIS control module to your Airbus-style cockpit build for more complete flight deck interaction, realistic tactile operation, and seamless expansion of your MA3F system.

Authentic Cockpit Replication

It is precision-engineered to closely replicate the appearance, dimensions, and operational feel of the real A320 FCU and EFIS system.

Every interaction is designed to recreate the experience of operating a real Airbus flight deck.

Custom Segment Displays

The system features custom-designed segmented displays that accurately reproduce the unique character styling, spacing, and visual layout of the real Airbus FCU, including authentic Airbus-specific display formatting.

Realistic Push-Pull Knob Mechanism

The system utilizes a specially engineered dual-rail spring-loaded push/pull mechanism designed to closely simulate the travel distance, resistance, and tactile response of the real Airbus autopilot controls, offering a significantly more authentic solution compared to conventional single-spring designs.

Fully Adjustable Cockpit Lighting

Independent adjustment for screen illumination, character backlighting, and button status indicators allows users to fine-tune their cockpit ambiance. It fully integrates with MOZA Cockpit telemetry lighting synchronization, delivering a perfectly cohesive visual experience across your entire setup.

Expanded Functionality Mode

When configured as a full EFCM suite, an individual EFIS module can optionally serve as an extended-function control panel. This unlocks additional functionality while effectively minimizing pilot workload and unnecessary head movements during flight.

Expanded Functionality Mode

MOZA's expansion mode lets pilots assign left/right module controls to real aircraft systems: transponder, weather radar, APU, windshear warning, TCAS, lighting, and more. More than an autopilot panel, the MA3F extends the desktop cockpit experience.

Broad Aircraft & Simulator Compatibility

At launch, the system supports Microsoft Flight Simulator and X-Plane Airbus platforms, covering default A320/A330 aircraft as well as popular high-fidelity third-party add-ons like the Fenix A320, ToLiss series, FlightFactor A320, and other widely used community airliners.

Techninė specifikacija

Features	
Product type	Flight control panel
Material	Polycarbonate (PC), Acrylonitrile butadiene styrene (ABS)
Compatible products	Fenix A320, ToLiss series, FlightFactor A320
Compatible games	Microsoft Flight Simulator, X-Plane
Weight & dimensions	
Width	155 mm
Depth	89.5 mm
Height	81 mm
Weight	542 g
Packaging content	
Cables included	USB Type-C
Packaging content	Data cable, desktop stand, mounting plate (included with EFCM L/R)
Power	
Input voltage	5 V
Input current	0.9 A
Ports & interfaces	
Input connection type	Type-C USB 3.0, RJ11
