Pagrindinės savybės

- ✓ Mygtukas
- ✓ PC
- ✓ Medžiaga: Aliuminis
- ✓ Juoda

Aprašymas

MOZA E-stop Switch

Immerse yourself in the thrill of racing games with peace of mind using the MOZA E-stop Switch.

Personalized Protection with Multiple Modes

Choose from three connection and protection modes:

Mode 1:

Connect the MOZA E-stop Switch directly to the PC via a USB cable. Pressing the switch only deactivates the force feedback, which is immediately restored upon release.

Mode 2:

Connect the MOZA E-stop Switch to the DASH on the base using an RJ11 cable (6 contact pins). Pressing the switch only deactivates the force feedback, which is immediately restored upon release.

Mode 3:

Connect the MOZA E-stop Switch to the E-STOP port on the base using an RJ9 cable (4 contact pins). Pressing the switch completely cuts off power, and after release, the base needs to be powered on again by pressing the power button on the base. Some games may require restarting to restore force feedback.

Aluminum Alloy Button and Casing

The MOZA E-stop Switch is crafted from aluminum alloy combining durability with style and functionality.

Techninė specifikacija

Savybės	
Palaikoma žaidimo platforma	PC
Gaminio tipas	Mygtukas
Produkto spalva	Juoda
