Pagrindinės savybės

- ✓ Professional Design Faithful Recreation
- ✓ 7.1” Square Displays
- ✓ Snap-On Magnetic Control Bezel
- ✓ USB 3.0 Transfer Power Supply
- ✓ Quick Angle-Adjustable Desk Clamp
- ✓ Expanded Functionality Mode

Aprašymas

Professional Design Faithful Recreation

From appearance to functionality, the FMP18 Panel Bundle delivers an industrial-grade recreation of a classic carrier-based aircraft front panel. Its layout and control logic closely replicate those of a real naval aviation cockpit.

True-to-Life 7.1'' Square Displays

The DDI and AMPCD modules feature true 7.1” square active display areas with an 800×800 resolution, closely matching the proportions and viewing experience of the real aircraft. This provides a vastly superior sense of realism compared to conventional cropped or rectangular display solutions.

Snap-On Magnetic Control Bezel

An innovative magnetic mounting system, combined with a pogo-pin connection, enables fast separation and reattachment of the display and button panel.

Adjustable Display and Backlighting

The display offers 10 levels of brightness adjustment, while the button and rotary-control backlighting supports 15 levels. Fine-tune the illumination for the most comfortable brightness. It stays clear in daylight and easy on the eyes at night, adapting to a wide range of flight sessions and scenarios.

High-Precision Tactile Control Feedback

All 95 buttons, 16 rotary controls, and 7 toggle switches are engineered to provide distinct tactile actuation feedback. This delivers clear input confirmation and significantly enhances cockpit realism during operation.

Quick Angle-Adjustable Desk Clamp

The included quick-adjust mounting clamp allows fast angle adjustment using a single M8 wrench without removing hardware. It supports both the complete FMP18 assembly and individual modules, while also maintaining compatibility with other MOZA display panels.

Modular Design Multiple Applications

Once the magnetic control bezel is removed, the display can be used independently to simulate civil aviation instruments and displays from other fighter jets.

Extensive Software Configuration

MOZA Cockpit software supports complete button and rotary knob mapping customization. Users can freely configure left, center, and right display assignments for flexible setup, streamlining integration into existing simulation environments.

Modular Design, Flexible Configurations

The FPP panel, display, and magnetic control bezel can be combined in different configurations or used independently to suit a wide range of flight simulation setups.

Techninė specifikacija

Features	
Product type	Flight panel set
Product colour	Black
Polling rate	1000 Hz
Number of displays supported	3
Display diagonal	18 cm (7.1")
Display 2 diagonal	18 cm (7.1")
Display 3 diagonal	18 cm (7.1")
Adjustable angle	Yes

Compatible products	PC, VESA mounts, aluminum profile
Weight & dimensions	
Width	456 mm
Depth	527 mm
Height	212 mm
Weight	5.4 kg
Packaging content	
Cables included	USB, USB Type-C
Racing seat included	No
Packaging content	USB 3.0 Type-A 1.5 m ×3, USB Type-C 1.5 m ×4, mounting bracket/clamp
Ports & interfaces	
Input connection type	USB 3.0 Type-A, USB Type-C
