Aprašymas

Slow Juicer MOVA SJ10

The MOVA SJ10 slow-running juicer will give you a new appreciation for the taste of fresh juices, convenience and full nutritional value in your daily diet. Thanks to its 120-millimeter opening, you can throw in whole fruits and vegetables without slicing them, saving time every morning. The two-stage squeezing technology and precision auger increase the amount of juice by 10% compared to traditional juicers, offering more delicious drink from the same amount of ingredients.

Fast and no slicing

The MOVA SJ10 uses a wide, 120-millimeter opening so you can throw in whole apples or pears without slicing first, saving time and reducing kitchen clutter. For your convenience, the unit also features an additional 45-millimeter inlet, ideal for inserting longer ingredients such as carrots or celery.

More juice, fewer wasted ingredients

Two-stage squeezing technology and a refined auger yield up to 10% more juice than standard machines. As a result, you get more valuable juice from the same fruit, reduce waste and save on product purchases.

Juice without grounds

The double filtration system separates the juice from the pulp, so you get a velvety drink without any particles of pulp, which will delight both you and your loved ones with its taste.

Taste and vitamins without loss

Thanks to its low speed (40-60 RPM), the MOVA SJ10 minimizes heat generation and friction, which preserves more vitamins and enzymes and prevents juice oxidation. The beverage stays fresh longer and retains its full color, flavor and nutritional value.

Versatile application

MOVA SJ10 allows you to prepare not only fruit and vegetable juices, but also smoothies, shakes or milk shakes. This allows you to enrich your diet with healthy, varied beverages to suit the needs of the whole family - from people who watch their weight to children who are reluctant to eat vegetables. It's also a great choice for those preparing homemade plant milks, baby food or frozen desserts.

Easy to use and clean

The device is designed for everyday convenience - it has an intuitive, simple assembly and disassembly system. You only need to clean 3 elements in contact with the pulp - the included brush will make it easy for you. In addition, the reverse function allows you to unclog the juicer without disassembling, which makes it easier to work with hard vegetables.

Included:

- Fruit and vegetable opening
- Squeezing auger
- Pitcher
- Base with motor
- Cup
- Pulp container
- Pusher
- Cleaning brush
- User manual
