Aprašymas

BoboVR M3 Pro Plus VR Battery Strap

Long VR sessions require high-performance equipment as well as comfort that allows you to focus entirely on the game. The BoboVR M3 Pro Plus is designed for Quest 3 and Quest 3S headset owners, offering a stable fit, precise adjustment, and an additional power source. Its thoughtful design reduces pressure on the face, and the efficient battery system extends the headset’s runtime. The package is rounded out by the DM1 charging station, which makes battery replacement quick and convenient. This solution is designed for people who want to spend more time in the VR world without unnecessary interruptions.

A Design Tailored to You

Every user has different preferences and a unique head shape, which is why the head strap features a comprehensive adjustment system. Front and rear adjustment dials let you quickly adjust the headset’s fit, while the rotating forehead pad ensures even greater comfort during extended use. The adjustable front support helps reduce pressure on the face, while the rear section keeps the headset securely in place on your head. You also have two usage modes at your disposal—Halo mode shifts most of the weight to the forehead, while Elite mode distributes the weight mainly across the face. This allows you to easily choose the configuration that best suits your needs.

Extra Power for Longer Sessions

The M3 Pro Plus features the BM60 power management system, which delivers better performance, a more user-friendly experience, and a clearer overview of the battery level. The 6500 mAh battery offers up to about two additional hours of runtime, letting you enjoy your favorite games, movies, and apps for longer. The system supports an output power of up to 20 W and an input power of up to 18 W, and a full battery charge takes about two hours. This solution minimizes downtime and provides greater freedom while using the headset.

Swap and Play Without Interruptions

One of the set’s most important advantages is the ability to swap batteries instantly. While one battery powers the headset, the other can remain in the docking station, ready for the next session. It takes just a moment to replace a discharged module with a charged one and immediately return to the game. This solution works especially well during longer sessions, virtual reality meetings, or intense gameplay using demanding applications.

DM1 Docking Station Included

The set includes the DM1 docking station, which simplifies daily charging and helps keep the player’s setup organized. Thanks to it, preparing the battery for use becomes even easier, and the entire set is always ready for action. The combination of ergonomic design, extensive adjustability, and a powerful power system makes the BoboVR M3 Pro Plus a practical addition to the Quest 3 and Quest 3S headsets, taking your VR experience to a whole new level.

Included

- VR strap
- battery
- DM1 charging station
- user manual

Manufacturer	BoboVR
