Aprašymas

VITURE Pro 256GB neckband

The VITURE Pro is a sleek, lightweight neckband that, when combined with the VITURE XR Glasses (Extended Reality, augmented reality), creates a mobile entertainment and work center. The device offers seamless support for Remote Play and Cloud Gaming, runs on Android, and with its capacious memory and outstanding performance, it works well for everything from watching movies to gaming to productivity on the go. Hand gesture support, 3DoF technology (Three Degrees of Freedom, stands for systems that track the rotational movements of the head - twisting, tilting and tilting), working on multiple screens simultaneously and a built-in microphone ensure full freedom and convenience of use. The VITURE Pro runs quietly, does not overheat and lasts up to 4 hours without charging, offering maximum functionality in an ultra-mobile form factor.

Ready for games, movies and work

The armband was created to integrate seamlessly with the VITURE XR Glasses, allowing you to use them to their full potential - both for entertainment and daily chores. Whether you want to remotely connect to your console or computer, watch movies on a large virtual screen, or use office applications, VITURE Pro provides uninterrupted, comfortable operation in any environment with Wi-Fi (Wireless Fidelity, a wireless connection to the network). With support for services such as Remote Play and Cloud Gaming, you can play your favorite titles from anywhere, without the need for extra cables or overheating devices.

The new version of the neckband introduces a number of improvements that significantly enhance the user experience. Hand gesture support allows you to control the interface without touch, making it more convenient and intuitive to use. Augmented reality, seamless switching between virtual screens, 3DoF technology and Smooth Follow make the whole thing work naturally and without a feeling of disorientation. This is especially important during longer work or entertainment sessions.

Elegance that goes hand in hand with performance

The VITURE Pro stands out for its minimalist, elegant design, but also for its impressive specifications. Equipped with Android, it allows you to install millions of applications - from streaming platforms to advanced office and creative tools. At your disposal is up to 256 GB of built-in memory and up to 12 GB of RAM (Random Access Memory), which translates into exceptional smoothness. The whole thing runs silently and with virtually no heat generation, making use of the device as comfortable as it is impressive.

Convenience of everyday use

The armband runs for more than four hours on a single charge, offering the freedom to operate without the need to constantly plug in. You can connect it to your devices via Bluetooth (a short-range wireless communication technology that allows you to quickly pair devices such as headphones, keyboards or controllers), Wi-Fi or USB-C (Universal Serial Bus, a connector used to power and charge electronic devices, as well as transfer data), and the built-in microphone allows you to make calls or use voice commands. What's more, the dedicated Neckband Remote app, available for Android and iOS, allows even better control over all functions and settings.

Your digital command center

The VITURE Pro is a groundbreaking device that combines the convenience of mobile use with capabilities that were previously reserved for laptops, consoles and desktops. With it, you can take the entire digital world with you - no compromises, no limitations, no heavy luggage. It is compatible with PlayStation 4 and 5, Xbox Series and Xbox One consoles, computers and laptops, mice, keyboards, console controllers, smartphones (both Android and iSO - iPhone Operating System, the operating system used in iPhones or iPads), portable HDD (Hard Disk Drive, hard drive) and USB drives. Just put on the wristband and immerse yourself in a space that adapts to your needs.
