Aprašymas

Compact soundbar with up-firing speakers, experience Dolby Atmos® 3D surround sound in smaller living spaces.

Dolby Atmos

Dive into sound reimagined with Dolby Atmos! Revealing depth, clarity, and detail like never before, Dolby Atmos is a sound experience you can feel all around you.

Dolby Atmos content is available on selected broadcast and streaming services or via external devices connected by HDMI like a Dolby Atmos compatible games console or Blu-ray player.

Bluetooth

Simple, fast, flexible: Connect your Bluetooth compatible smartphone, tablet or PC to your Sharp device to stream audio wirelessly.

eARC

eARC (enhanced Audio Return Channel) allows you to use your TV as a hub for external devices and send audio from your TV to your soundbar using a single HDMI cable. With increased bandwidth (vs. ARC) it can support a wider range of audio formats as well as expanded features such as automatically correcting processor delays so that your audio and video always match, as well as lip sync correction. CEC (Consumer Electronics Control) is a convenient feature that allows your CEC compatible TVs remote to control key functions of the soundbar like standby, volume and mute.

EQ Presets

Equaliser presets adjust the sound profile to better suit the genre of TV programme you are viewing. Choose from: Movie, Music, Voice, Night and Off. Adjusting the bass and treble allows you to create your own customised EQ preset.

Compact yet powerful sound

A compact size but powerful sound means this soundbar is suitable for small to medium sized spaces.

Dolby Virtualizer

Dolby Surround Virtualizer uses smart algorithms to analyse the audio source and adds virtual channels to make it seem like the sound is coming from different directions. This creates a more immersive and spacious audio experience, especially useful when you can't have a full surround sound speaker setup.
