through time.

A Perfect Addition to the Classroom, in Person or Remote

The ViewSonic ID710-BWW Pen Display is a digital interactive tool designed to support both in person, hybrid, and online learning. The extended screen feature allows for students to digitally take notes without distraction or interruption, wherever they are.

Write like You Always Have

ViewSonic ID710-BWW comes with a professional digitizer pen boasting 8192 levels of pressure sensitivity that can register thick and thin strokes meticulously. A 250 pps response rate and 5080 LPI ensure definition and accuracy, while a +/- 45 tilt detection allows for a more natural writing experience.

Write What You Want, Where You Want Too

The ID710-BWW Pen Display has minimized parallax, meaning that whenever you make a mark, it appears exactly where you wanted it too. Unlike other LED drawing tablets, we've reduced the gap between screen and sensor, allowing you to write precisely, every time.

Software at Your Fingertips

The ViewSonic ID710-BWW Pen Display integrates seamlessly with a host of software that supports drawing, digital whiteboarding, as well as inking tools. Easily run and incorporate software such as myViewBoard whiteboard, OneNote, Microsoft 365, and more. This makes sure you can get done what you need to, however you work.

Ditch the Batteries

Never buy batteries for your stylus again. ID710-BWW's Ink Pen runs completely battery free, being powered directly off the surface of the tablet itself.
