Pagrindinės savybės

- ✓ Supports Mesh Wi-Fi Handover, allowing wide-coverage connectivity. Tri-Band Wi-Fi guarantees smooth and stable Wi-Fi connections via 2.4GHz, 5GHz and dedicated Mesh 5GHz frequencies
- ✓ Supports QTS/QuRouter dual-system with home cloud 2.0 solution for easier NAS applications and routing configuration
- ✓ Easily and securely connect to your company networks and multi-site VPN using the built-in QNAP SD-WAN solution, QuWAN
- ✓ Use the QMiroPlus-201W as a home storage and entertainment center with various apps for file management, backup, and multimedia
- ✓ HybridMount integrates mainstream cloud services and local caching, allowing you to access cloud-based files as if they were stored locally
- ✓ One 2.5GbE host management port and four Gigabit ports for flexible LAN and WAN deployment

Aprašymas

To embrace the new normal of remote working, businesses must deploy not only a remote VPN that is quickly accessible by multi-location users, but also a high-speed in-premises wireless network and a smarter file storage solution. The QMiroPlus-201W with QNAP Home Cloud 2.0 Solution combines a Mesh Wi-Fi AC2200 router and 2.5GbE NAS to decomplicate your network settings. With two 2.5-inch SATA drive bays and SD-WAN technology, QMiroPlus-201W integrates multi-cloud environments allowing you to centrally manage and access locally-stored and cloud-based files and data, building next-generation networks for homes and remote working.

Easy 6-Step Installation with the QuRouter App

Network settings are greatly simplified with the QuRouter App. With Bluetooth and a Settings Wizard you are only six steps away from setting up your smart home network and cloud storage applications.

Connect your Home with High-Coverage Tri-Band Mesh Wi-Fi

Say goodbye to weak Wi-Fi signals by setting up a Mesh Wi-Fi structure in your home. QMiroPlus-201W adopts Wi-Fi Handover technology, allowing multiple users to be automatically connected to the router with the strongest Wi-Fi signal with a single SSID.

Dedicated Tri-Band Mesh Wi-Fi for Smooth Connections

The QMiroPlus-201W supports Tri-band Wi-Fi of 2.4GHz, 5GHz and a dedicated Mesh Wi-Fi 5GHz band for high-bandwidth connections between Mesh Wi-Fi routers. Unlike conventional dual-band routers whose 5GHz band must be shared between Wi-Fi clients and Mesh Wi-Fi routers, the QMiroPlus-201W guarantees smooth and stable Wi-Fi connections.

File Storage and Backup - Easily to Use for All Ages

QMiroPlus-201W provides convenient internet storage space for everyone in your family. Simply follow the beginner's guide to create family accounts, and then invite them to enjoy centralized data storage and real-time backup services.

Convenient connectivity for remote workers

Working from home has transformed the lives and daily practices of workers and businesses alike, but now the challenge is ensuring that we are always securely connected to business IT. QNAP QuWAN is a SD-WAN solution that enables automatic Mesh VPN topology from corporate networks to personal home routers. Once your home QMiroPlus-201W is set up, QuWAN Cloud Orchestrator enables QMiroPlus-201W to connect to the mesh VPN whether in router mode or AP mode. After that, your QMiroPlus-201W is your gateway to the company cloud. You can even mount storage from your company's NAS to your QMiroPlus-201W for quick and convenient access to important files and data.

Sync and back up your data anytime, anywhere

With Qsync and Hybrid Backup Sync (HBS) you can easily sync and back up your data from anywhere at any time. Qsync enables you to sync data between a QMiroPlus-201W and other end devices, while HBS helps back up data from the QMiroPlus-201W to a QNAP NAS or public cloud storage. Both apps work seamlessly with the QMiroPlus-201W to create a secure cross-device and multi-version backup solution.

Centralize your Cloud Storage

With the File Station app you can centrally manage various cloud storage accounts (including Google Drive and Dropbox), allowing quick and easy access to your files wherever they are stored. QMiroPlus-201W also supports HybridMount cloud storage, allowing you to mount storage accounts from mainstream cloud providers.

Safe storage for your photos

By combining QNAP's QuMagie mobile app with the QuMagie Smart Album on QMiroPlus-201W, you can automatically back up photos from mobile devices as soon as they are taken. QuMagie also uses AI deep learning algorithms to help organize your photo collections, including using facial, object, and location recognition.

Create a family-friendly internet environment

Parental controls are included for you to block inappropriate sites and filter keywords on search engines to ensure that everyone in your family can use the internet safely.

Protect yourself from breaches and intrusion

QNAP follows the Zero Trust ("never trust, always verify") security model, helping to protect you from malware and intrusion. Connections, devices, and IP addresses can also be blocked using the NAT.

QuRouter OS: User-Friendly Router Management

With a web-based GUI and at-a-glance dashboard, the QuRouter OS provides a user-friendly interface for everyday network management. The QMiroPlus-201W also supports wireless router or AP mode configuration via the QuRouter OS, allowing dispatching an IP address as a master router or receiving an IP address from another main router. With the QuRouter OS, not only can users efficiently manage all connected wired and wireless devices in real-time, but they can also configure NAT, VPN, security and QuWAN advanced functions.

Stylish Morandi blue and fanless design for homes

Combining style and functionality to fit modern digital homes, the QMiroPlus-201W's design includes Morandi colors and near-silent cooling design.

Techninė specifikacija

Storage	
Storage drives installed	No
Total installed storage capacity	0 TB
Number of storage drives installed	0
Number of storage drives supported	2
Installed storage drive type	No
Supported storage drive types	HDD & SSD
Storage drive capacity	0 GB
Supported storage drive interfaces	Serial ATA II, Serial ATA III
Storage drive sizes supported	2.5"
Processor	
Processor family	Intel® Celeron®

Processor manufacturer	Intel
Processor model	J4125
Processor frequency	2 GHz
Processor cores	4
CPU configuration (max)	1
Memory	
Internal memory	4 GB
Internal memory type	DDR4
Flash memory	4000 MB
Network	
Ethernet LAN	Yes
Ethernet LAN data rates	1000,2500 Mbit/s
DHCP client	Yes
DHCP server	Yes
Ports & interfaces	
Ethernet LAN (RJ-45) ports	5
USB port	Yes
USB 3.2 Gen 1 (3.1 Gen 1) Type-A ports quantity	2
Design	
Chassis type	Desktop
Product colour	Blue
Performance	
Type	NAS
Device class	Home & Home Office
Reset button	Yes
On/off switch	Yes
Software	
Operating system installed	QNAP Turbo System
Operating system version	4.5.2
Power	
Power supply location	External
Number of power supply units	1
Power consumption (typical)	60 W
Output voltage	12 V

Weight & dimensions

Width	105 mm
Depth	183.5 mm
Height	143.5 mm
Weight	1.44 kg
Package width	142 mm
Package depth	268 mm
Package height	228 mm
Package weight	2.15 kg

Packaging content

External power adapter	Yes
Cables included	AC, LAN (RJ-45)
Package type	Box

Processor special features

Embedded options available	No
Enhanced Intel SpeedStep Technology	Yes
Execute Disable Bit	Yes
Idle States	Yes
Intel 64	Yes
Intel Virtualization Technology (VT-x)	Yes
Intel Virtualization Technology for Directed I/O (VT-d)	Yes
Intel VT-x with Extended Page Tables (EPT)	Yes

Operational conditions

Operating temperature (T-T)	0 - 40 °C
Operating relative humidity (H-H)	5 - 95%

Logistics data

Country of origin	China
Harmonized System (HS) code	84714100
Products per master (outer) case	4 pc(s)

Other features

Warranty period	2 year(s)
