Aprašymas

BlitzWolf BW-AG1 Pro AI Smart Glasses with Interchangeable Photochromic Lenses

The BlitzWolf BW-AG1 Pro AI Smart Glasses with interchangeable photochromic lenses are an advanced model that combines 4K video recording, AI support, and visual comfort in varying lighting conditions. The glasses are equipped with an 8 MP Sony camera with image stabilization, fast data transfer via Wi-Fi, and Bluetooth 5.3 connectivity. Additionally, the photochromic lenses automatically adjust to the light, making the glasses suitable for both outdoor and indoor use.

4K camera and dynamic image capture

The BW-AG1 Pro features an 8 MP Sony camera that allows you to record 4K video and take detailed photos. EIS image stabilization reduces shake, resulting in smoother footage while on the move. Quick recording startup in about 0.8 seconds lets you capture important moments without delay. Additionally, the smart flash improves image quality in low light by reducing noise and enhancing detail visibility.

Photochromic lenses and flexible adaptation to conditions

The photochromic lenses automatically darken in sunlight and lighten indoors. This eliminates the need to switch glasses depending on the environment, enhancing everyday comfort. The ability to swap lenses allows you to further tailor the glasses to specific needs, such as computer

work or outdoor activities. The glasses also offer UV protection and the option to use prescription lenses.

AI features and smart assistant

The glasses use artificial intelligence to recognize objects in real time, which can be helpful in everyday situations. The built-in AI translator enables conversations in various languages and quick text translation. The "HeyCyan" voice assistant responds to commands and lets you get information without having to reach for your phone. Responses are delivered directly through the glasses, enhancing user convenience.

Hi-Fi sound and clear communication

The built-in audio system delivers clear and balanced sound for both music and calls. The dual noise-canceling microphone focuses on the user’s voice while minimizing ambient noise. Beamforming technology further enhances communication quality by precisely locating the sound source. A stable Bluetooth 5.3 connection ensures smooth, interference-free operation.

Fast data transfer and efficient connectivity

Thanks to the WiFi module, the glasses allow for fast transfer of photos and recordings to your phone, even many times faster than via Bluetooth. This solution makes it easy to manage your content without the need for cables. Support for WiFi 4 and Bluetooth 5.3 allows you to use various features simultaneously without any loss of performance. Additionally, the cooling system protects the electronics from overheating during intensive use.

Lightweight design and comfort

The frames, made of TR material, are lightweight, flexible, and damage-resistant, which increases their durability. Weighing approximately 35 grams, the glasses are comfortable even when worn for hours on end. The minimalist design ensures the technology remains unobtrusive. As a result, the model is suitable for both everyday use and a more active lifestyle.

Long battery life and convenient charging

The glasses offer long battery life, allowing you to enjoy recording, music, and calls for hours on end without interruption. Magnetic charging makes it easy to connect the device quickly and reduces the need for frequent charging. This solution is particularly useful during a busy day out and about. As a result, the user can focus on using the features without unnecessary interruptions.

Included

- Replacement lenses (a pair of interchangeable lenses with a blue light filter as a gift)
- Charging cable
- Storage case
- Cleaning cloth
- User manual

Manufacturer	BlitzWolf
Model	BW-AG1 Pro
Finish	TP
Chip	JL7018F
Coprocessor chip	V821L2
Camera	8 megapixels
Memory	4GB (expandable to 32GB)
