Aprašymas

Neewer GL1 Pro 2900-7000K LED Light Panel

The Neewer light panel provides efficient, eye-friendly light with a high color rendering index (97 CRI). You can adjust its brightness and color temperature, and with 3 connection options available, you can choose the one that works best for you. A dedicated app makes it easy to control the device, and its quiet operation ensures the panel won’t disturb you while you’re working or gaming.

Convenient Control

From the dedicated app, you can control a single light source or multiple panels simultaneously. After downloading the NEEWER Live plugin from the Stream Deck platform, you can customize the panel’s behavior to suit your needs. Freely adjust brightness, color temperature, turn the lighting on/off, and more.

3 Connection Methods

You can connect the light panel to your equipment in three ways. Use the included 2.4 GHz USB dongle, then download the NEEWER Live app. You can also connect via Wi-Fi and conveniently adjust the brightness or color temperature without interrupting your gameplay or live stream. A Bluetooth module is also available, allowing you to remotely customize the panel’s settings through the NEEWER app.

Even, Eye-Friendly Light

The panel generates light with a maximum intensity of 3,700 lux / 0.5 m, allowing you to take shadow-free photos. You can adjust the brightness from 0% to 100% and the color temperature within the range of 2,900 K – 7,000 K. Thanks to its well-thought-out design, the device does not cause flickering or glare, and its color rendering index (CRI) of 97 ensures precise color reproduction. The light it emits is also easy on the eyes.

Refined Design

That’s not all the Neewer GL1 Pro has to offer. The panel’s housing is made of a material that effectively dissipates heat, protecting it from overheating. The device operates quite quietly, so you don’t have to worry about it disturbing you while you work. Additionally, the included stand fits desks with a thickness ranging from 0.9 to 7.5 cm. You can also adjust its height between 35 and 60 cm.

Included in the set

- Light panel
- 2.4 GHz USB receiver for PC/Mac
- Desk stand
- Power adapter
- Power cord

Manufacturer	Neewer
Model	GL1 Pro
