Aprašymas

The Club 3D CAC-1307 HDMI™ Active 4K60Hz Repeater extends the length of any HDMI™ cable by regenerating the HDMI™ signal before it sends the outputs to the HDMI™ monitor or projector. The active HDMI™ repeater will clean out the digital

noise (sparkles) in your picture. The input of the HDMI™ active repeater is connected with a long HDMI™ (male to male) cable from the HDMI™ device like DVD player or Satellite set top box with a HDMI™ output port. The HDMI™ active repeater output is connected to a second HDMI™ (male to male) cable to go from the output to any HDMI™ display or projector with a HDMI™ connector. The unit is placed as near as possible to the display(max. distance 5 m/16.4 ft) to remove any noise that has been generated by a long HDMI™ cable.
