### Aprašymas

Have you long dreamed of a desk that will fit you completely? Behold the GENESIS Holm Modular 160 - a desk designed for maximum comfort and personalization. Adjust the height, manage your cables, and if necessary - create a unique configuration using additional commercially available panels in 30, 40 and 60 cm sizes. With additional elements you will create not only a classic desk, but also a fully functional corner desk. It all depends only on you.

## A DESK TO FIT YOUR NEEDS

If you dream of expanding your workstation in the future, but don't want to replace your desk with a new one, the GENESIS Holm Modular will meet your expectations. This model is characterized by high functionality and full versatility, all thanks to dedicated, easily assembled side panels of different sizes, which you can buy separately. Forget about the inelegant joining and covering the top with a pad. We've made sure that connecting the panels to the fixed, center section is completely aesthetically pleasing. Do you need a custom size? Do you want to widen the desk on one side only? Or are you looking for a desk that will grow with your child's needs? No matter which option you choose, the GENESIS Holm Modular will allow you to organize the space the way you want.

## ONE RACK, MANY POSSIBILITIES

Upgrading your desk has never been so easy. When modifying the GENESIS Holm Modular, you don't need anything but side panels or a corner set and a 50 cm panel (if you plan to create this type of construction and have a set other than the GENESIS Holm Modular 160). This is made possible by an extendable frame made of metal, which is a stable base for both 120 and 180 cm widths. That's right - you don't have to replace the frame. You just need to adjust its width to the mounted wings of the tabletop. It's trivial.

## REGULATORY POWER

You also do not have to worry about its height. Already at the assembly stage you can choose from 5 levels, thus defining the positioning of the tabletop between 70 and 90 cm. Thus, you can easily adjust it to your height, making the GENESIS Holm Modular fully ergonomic. The dedicated cable shelf is also adjustable. You can extend it from 50 to 95 cm, and thus adjust it to the dimensions of the entire tabletop. Its depth will make it easily accommodate even large surge strips.

## DETAILS THAT MATTER

Sit back and see how enjoyable work and entertainment can become. GENESIS Holm Modular is equipped with a number of functional extras. You no longer need to put your drink on the countertop. Placing it in a dedicated holder will prevent accidental spills. It is no different with headphones - thanks to a special holder they will finally have their place. You can easily change the position of both or hide them under the countertop. A special grommet accommodating the entire power plug will take care of aesthetics. You can easily pass the cable through it, and all this without affecting the appearance of your setup.

## CLIMATE? WE KNOW SOMETHING ABOUT IT

Add flair to your work or gaming area with high-quality LED lighting. The mounted strip is more than just a classic backlight. Thanks to its distinctive design, it disperses lighting much better, and on top of that you can fully adjust its angle or remove it completely, placing it in a different place. Needless to say, you can easily change its mode of operation, right? This is the GENESIS Holm Modular in its full glory.

### Techninė specifikacija

| **Design** | |
|---|---|
| Type | Straight |
| Table top shape | Rectangular shape |
