Aprašymas

VEXILAR V18 Cordless Upright Vacuum Cleaner

The VEXILAR V18 upright vacuum cleaner is a cordless model designed for cleaning floors, carpets, furniture, and hard-to-reach areas. The 650 W motor generates suction power of up to 70 kPa, allowing the vacuum to effectively pick up dust, crumbs, hair, and other everyday debris. The vacuum cleaner offers 4 suction power levels, up to 70 minutes of runtime on a single charge, 6-stage filtration with a HEPA filter, and a 1-liter dust container. The electric brush with green LED backlighting helps you spot dirt on the floor, and the display shows the battery status and device operation. A removable battery, telescoping tube, handheld vacuum function, and charging station enhance the convenience of everyday use.

70 kPa Suction Power and 4 Power Levels

The 650 W motor delivers suction power of up to 70 kPa, allowing you to effectively remove both fine dust and larger crumbs or hair. Four power levels allow you to adjust the vacuum cleaner’s performance to the type of dirt and the surface being cleaned. Lower settings are useful for everyday vacuuming of hard floors, while higher settings help remove tougher dirt from carpets. The electric brush, featuring a roller that combines bristles and rubber strips, helps collect debris from laminate, tile, hardwood floors, and carpets.

Up to 70 minutes of runtime and a removable battery

The VEXILAR V18 can run for up to 70 minutes on a single charge, allowing you to clean multiple rooms without interrupting your work. Actual runtime depends on the selected suction power level. The battery consists of 8 cells, each with a capacity of 2200 mAh, and can be easily removed

from the device. If needed, you can purchase a spare battery and swap it out during longer cleaning sessions. The cordless design gives you the freedom to move around your home without having to search for outlets or drag a cord between rooms.

Electric Brush with Green LED Light

The green LED light helps you spot fine dust, hair, and crumbs that may be difficult to see under normal lighting. It’s especially useful when cleaning under beds, sofas, or cabinets. The electric brush head rotates sideways through a 180° range and tilts vertically up to 90°, making it easier to maneuver around furniture and reach the spaces underneath. The telescoping wand allows you to adjust the vacuum’s length to your height and comfortably clean higher surfaces.

6-stage filtration system and 1-liter dustbin

The 6-stage filtration system helps trap contaminants inside the vacuum cleaner and reduce the amount of fine dust released into the air. It includes centrifugal sedimentation, a steel mesh filter, cyclonic separation, a foam filter, a HEPA filter, and an exhaust filter. Each stage separates larger debris and captures finer dust particles. The 1-liter dust container does not need to be emptied frequently, and the one-button opening system allows you to quickly remove its contents. Selected components of the filtration system are also washable, which simplifies maintenance of the device.

LED Display and Lightweight Design

The easy-to-read LED display shows the selected suction power level, battery status, and estimated runtime until the battery runs out. It also alerts the user to issues such as a jammed electric brush roller or blocked airflow. This allows the user to respond quickly and restore the device to proper operation. The weight of approximately 1.6 kg, designed for a lightweight handheld design, makes it easy to clean furniture and hard-to-reach areas. The vacuum can also be stood upright without leaning against a wall, which is useful during short breaks in cleaning.

Upright and handheld vacuum in one device

The VEXILAR V18 can be used as either an upright or handheld vacuum, depending on the type of surface being cleaned. After detaching the hose, the device is suitable for cleaning sofas, armchairs, shelves, and other areas that are difficult to reach with a standard floor brush. The crevice tool helps remove crumbs from between cushions, along furniture edges, and in window tracks. The 2-in-1 brush attachment is useful for vacuuming upholstery, keyboards, furniture, and pet beds, where dust and pet hair can accumulate.

Charging Station and Convenient Storage

The vacuum cleaner comes with a charging and storage station that provides a stable place to set the device down after cleaning. It requires no drilling or mounting brackets on the wall, so you can place it in a convenient spot and easily move it as needed. The station allows you to store and charge the vacuum cleaner at the same time, ensuring the device is ready for its next use.

Included in the set

- VEXILAR V18 vacuum cleaner (main unit)
- Floor brush with LED lighting
- Telescopic tube
- Crevice tool
- Vacuum cleaner cleaning brush
- Replaceable battery
- HEPA filter x 2
- AC power adapter
- Charging and storage station
- User manual
