Aprašymas

Lightweight and compact design meets smooth power for work in a variety of materials

This lightweight and compact drill driver provides the ideal mix of power and versatility. The ergonomic design offers comfortable handling. Always using the right amount of power on every task is possible thanks to 20 different torque settings and a maximum setting. Its 2-speed planetary gearbox provides a long lifetime and good working progress. The UniversalDrill 18V is the perfect choice for drilling and screwdriving in wood, metal and plastics.

Two gears for consistently optimal power

The 2-speed gearbox enables choosing the right power setting for each job. Its low-speed first gear is ideal for screwdriving and drilling larger diameters, while its second gear allows a quick drilling progress at small diameters.

Precision made easy

20 torque stages for maximum precision: simply select the desired torque on the pre-setting ring for individual adjustments on different materials. Once set, the max final setting ensures optimum power.
