Aprašymas

Compact Power with 65W and 3 Ports

Delivering up to 65W of total power across three ports, this mini GaN wall charger is designed to charge your laptop, tablet, and smartphone simultaneously. The integrated TFT display provides real-time feedback on voltage, current, and output, giving you full visibility over your charging status. With PPS (Programmable Power Supply) technology, each device receives the optimal charging current for faster and safer performance.

Smart Display

The integrated touchscreen display shows real-time insight into the GaN Charger’s performance. Switch between modes to view total wattage, individual port power output, total charging time, and charging status—Eco or Turbo Boost. The display can also be flipped, ensuring it’s easy to read no matter how the charger is oriented in the socket.

Safe, Smart, and Efficient

Engineered with GaN technology, this charger offers superior energy efficiency in a smaller form. It runs cooler than traditional silicon chargers and includes multiple safety systems such as overcurrent, overvoltage, overheating, and short-circuit protection. Combined with its robust fireproof PC housing, it ensures worry-free charging wherever you are.

The Ultimate Travel Companion

With its replaceable EU, UK, and US plugs, it’s the ultimate travel companion. Lightweight yet powerful, it adapts to your devices and your location with ease. Whether you’re at home, in the office, or abroad, the Verbatim Mini GaN Charger with Display keeps all your essentials charged and ready.
