Aprašymas

USB 3.2 Type-C Ethernet cable, C/M to RJ45/M, 1 Gbps, active, black/grey, 10 m" from LogiLink

The LogiLink USB CAT6 LAN adapter cable is the practical Ethernet solution for all USB-C devices without their own RJ45 port. Thanks to the chipset built into the USB connector, the cable replaces the USB-C to RJ45 adapters that were previously always required. With this cable, an Ethernet connection with a data transfer rate of up to 1 Gbit/s is immediately available without any additional drivers. Connect your router, modem or

network switch to the USB-C port of your laptop, tablet or smartphone. Thanks to foil shielding (FTP), the data transfer is effectively protected against interference. The textile sheath of the cable has a pleasant feel and also protects the cable against abrasive wear. High-quality and robust metal plugs with kink protection ensure a particularly long service life. The USB-C connection is compatible with notebooks from popular manufacturers such as Lenovo, HP or Dell as well as with Windows, macOS and Android. Thunderbolt3 devices such as the Apple MacBook or iPad are also supported. Note: The cable is not suitable for game consoles!
