Aprašymas

Mova K10 Pro cordless mop upright vacuum cleaner.

Find out that cleaning can be easy and fun. The Mova K10 Pro cordless upright vacuum cleaner will allow you to not only vacuum your floors, but also wet mop them. This will quickly and effectively get rid of even the most stubborn dirt! The device is distinguished by a suction power of 15,000 Pa and an operating time of up to 30 minutes, and it also intelligently detects dirt and supports the self-cleaning function. At the same time, it is very convenient to use and has a built-in LED screen that will provide you with all the most important cleaning information.

A reliable ally in the fight against dirt

With the Mova K10 Pro, you will get rid of dirt in every nook and cranny in no time. The vacuum cleaner is equipped with a motor running at up to 120,000 rpm, which allows you to enjoy a maximum suction power of 15,000 Pa. As a result, it quickly and thoroughly eliminates most dirt, such as dust, dander and crumbs. What's more, the device intelligently detects the degree of dirt in the environment and automatically adjusts its work depending on this. As a result, it provides fantastic results with optimal energy consumption!

Fast and thorough floor cleaning

With the help of the vacuum cleaner you will not only vacuum, but also wash the floor - the K10 Pro model will quickly and effectively deal with even stubborn stains. The device is equipped with 2 water tanks - one for clean (890 ml) and the other for dirty (600 ml). This way you can be sure that dirt will not end up back on the tiles or panels you just washed! However, the possibilities don't end there. Mova K10 Pro offers a clean water electrolysis function to produce powerful disinfectants in real time. As a result, it reduces up to 99.99% of harmful bacteria and viruses. So you can take better care of your health and that of your loved ones!

With your convenience in mind

Mova K10 Pro is a successful combination of powerful capabilities and a lightweight, ergonomic design. The vacuum cleaner weighs only 3.8 kg - you can easily carry it upstairs or lift it to vacuum the ceiling. It is also equipped with a special drive that automatically steers it forward, making it much

easier to maneuver. In addition, the comfortable handle and swivel design make it easy to guide the device and provide unparalleled comfort. All this will allow you to clean your apartment without any effort!

Working time of up to 30 minutes

You no longer have to worry that a vacuum cleaner discharged too quickly will cause an unwanted interruption in cleaning. The K10 Pro is equipped with a 7x 2400 mAh battery pack, which can provide a run time of up to 30 minutes (in Auto mode). This is long enough to thoroughly clean floors with a total area of up to 200 m²! This makes the device perfect for both small and slightly larger apartments or houses.

Brush for special tasks

The vacuum cleaner is equipped with a specially designed brush that allows thorough cleaning also along the edges - for example, at skirting boards and in narrow corners. It also offers two scrapers - front (hard) and rear (rubber). The former effectively eliminates hair, dander and other types of dirt, while the latter removes water residue, giving you peace of mind that your home's floor will be spotlessly clean.

Smart cleaning

Enjoy convenient access to information. The vacuum cleaner's built-in smart LED screen will let you quickly check the selected suction mode, battery status, how full the water tanks are, the current level of contaminants in the environment and more. All it takes is a glance! But it doesn't stop there - the Mova K10 Pro supports voice messages, so it can provide you with cleaning information in real time.
