Aprašymas

MOVA Mobius 60 cleaning robot

Enjoy your free time while Mobius 60 cleans for you. It is an advanced cleaning robot that combines high suction power, intelligent navigation, and a sophisticated mopping system to effectively keep your entire home clean. The device is designed for different types of surfaces and everyday challenges – from greasy stains in the kitchen to dust in the corners of rooms and obstacles on thresholds and carpets.

Cleaning on your terms

Mobius 60 is the first cleaning robot on the market to offer intelligent, zone-based mopping with automatic mop replacement (MopSwap Hub). The set includes three types of pads: ThermoHold Mop for greasy, stubborn stains in the kitchen and dining room, Plush Mop for delicate floors such as wood and marble, and HyperClean Mop for everyday use. Each is designed for a different type of dirt, allowing for precise cleaning tailored to the room. Thanks to its integration with the app, the robot automatically selects the appropriate mode depending on the type of floor and area of the house.

100°C self-cleaning system

Thanks to the self-cleaning function using hot water at temperatures of up to 100°C, the mop pad always remains hygienically clean. Four temperature levels help to effectively dissolve dried dirt, grease, and other stubborn stains. The system has 20 spray nozzles evenly distributed for increased cleaning efficiency. The whole system is designed for easy maintenance – you don't have to worry about unpleasant odors or time-consuming manual cleaning.

2 cleaning fluid tanks

The robot is equipped with two independent fluid tanks: one for standard cleaning agent, the other for removing pet odors. This allows you to customize the cleaning method to suit your needs. The intelligent MOVAhome app allows you to set the cleaning mode and the appropriate liquid dosage. In addition, the system detects low liquid levels in each tank separately, and the increased capacity of 600 ml reduces the frequency of

refilling.

Suction power up to 30,000 Pa

The TurboForce8 motor, with a speed of up to 110,000 rpm, generates a pressure of up to 30,000 Pa for effective suction. This allows the robot to easily handle both fine dust and larger debris. Five suction power levels allow you to adjust the operating mode to the type of surface. The improved motor makes cleaning crevices and carpets even more effective.

Thorough carpet cleaning

MOVA Mobius 60 automatically detects carpets and adjusts its operation accordingly. Thanks to the Dynamic Suction Retention system, the robot lowers the main brush, creating a more precise connection with the floor. This allows it to effectively remove dust, pet hair, and human hair deeply embedded in the carpet fibers. A special pressure cover provides additional sealing and improves suction power.

Easily overcomes thresholds

The robot moves freely throughout your home, regardless of differences in floor height. The StepMaster™ 2.0 system allows it to overcome sliding door rails and single thresholds up to 5 cm and combined thresholds up to 8 cm without the need for manual lifting. Thanks to its movable feet and a special "climb-cross-reset" sequence, the robot effectively avoids obstacles such as chair legs and children's toys.

It doesn't miss any spots

Advanced FlexiRise™ navigation allows the robot to work even in hard-to-reach places. In low spaces – under furniture or cabinets – the LDS system automatically retracts, lowering the height of the device. In open spaces, on the other hand, it rises to ensure full 360° scanning of the environment and effective route planning.

Precise obstacle avoidance

Thanks to a triple detection system (RGB camera, side laser, and LDS), Mobius 60 effectively recognizes and avoids obstacles in real time. Built-in LED lighting allows it to work even in low light conditions – at night or in dark corners. The robot recognizes over 200 types of obstacles and independently selects the optimal cleaning route.

Hair entanglement prevention system

Both the brushes and wheels are equipped with mechanisms to prevent hair tangling. TroboWave™ DuoBrush technology combines a bristle brush and a rubber brush that collect hair without wrapping it around. Additional solutions have also been applied to the wheels, which clean themselves, thus increasing the service life of the entire device.

Included in the set

- cleaning robot
- docking station
- main brush and brush cover (x1, installed)
- side brush (x1, installed)
- dust container (x1, installed with filter)
- mop pads (x4 ThermoHold; x4 Plush; x4 HyperClean)
- mop pad holder (x6, installed)
- floor cleaning fluid x1
- pet odor eliminator x1
- power cable x1
- docking station ramp extension x1
- 3.2l dust bag (x2, including 1 installed)
- user manual x1

Manufacturer	MOVA
Model	Mobius 60
Battery capacity	6400 mAh
Suction power	30,000 Pa
Dust tank capacity	300 ml
Water tank capacity	70 ml
Operating time	vacuuming: 205 min; vacuuming and mopping: 150 min
Mopping function	Yes, mop pads
Self-cleaning function	Yes
Navigation system	FlexiRise™ Navigation
Features	automatic mop pad replacement system (MopSwap Hub), 2 cleaning fluid tanks, automatic mop pad cleaning
Filter type	HEPA
Compatibility	Movahome app, Amazon Alexa, Siri, Google Assistant
Clean/dirty water tank capacity in the docking station	5 l / 4.5 l

Gross weight: 31070, Net weight: 23180, Box length: 67,00, Box width: 50,50, Box height: 52,50, Pojemność akumulatora: 6400, Dust container capacity (l): 3.2, Suction power (Pa): 26000, Water container capacity (l): 5, GPSR Link: https://psr-assets.innpro.pl/small_appliances/sg_small_appliances_vacuum_cleaners.pdf, Information about data generation: https://dataact.innpro.pl/mova/6977728947556, PPWR: https://ppwr.innpro.pl/mova
