Aprašymas

MOVA E20s Pro Cleaning Robot (White)

Daily cleaning can be simpler, quieter, and fully automated. The MOVA E20s Pro Cleaning Robot is a device designed for homes where efficiency, intelligent operation, and convenience without constant supervision are important. Powerful suction, precise laser navigation, and efficient obstacle avoidance allow you to thoroughly clean any space, while the simultaneous vacuuming and mopping function takes care of your floors in a single cycle. Automatic carpet adjustment, advanced hair tangling prevention systems, spacious tanks, and long operating time mean that cleaning takes place with almost no intervention on your part. The whole thing is complemented by an intuitive app and voice control, which give you full control over the cleaning process exactly when you need it.

Impressive power enclosed in an elegant form

The MOVA E20s Pro combines advanced technology, intelligent control, and high cleaning efficiency. At the heart of the device is the proprietary TurboForce 6 motor with a speed of up to 80,000 revolutions per minute, which generates an impressive suction power of 13,000 Pa – 46% more than the previous generation. Such high performance allows for effective removal of dust, crumbs, and larger debris with an efficiency exceeding 99.5%, while maintaining quiet and energy-efficient operation. The Carpet Boost function allows the robot to automatically recognize carpets and increase suction power to more thoroughly remove dirt hidden deep in the fibers.

Intelligent navigation and precise space mapping

Advanced LDS laser navigation and a 360° scanning system are responsible for accurate movement around the home, quickly scanning the environment and creating precise maps of rooms. The system supports multiple cleaning modes and intelligent multi-layer maps, allowing you to set virtual walls and exclusion zones. Smart Pathfinder technology ensures logical, optimized routes, allowing the robot to clean faster, more thoroughly, and without unnecessary repetition.

Effective obstacle avoidance with 3DAdapt™

The MOVA E20s Pro is equipped with a linear laser that recognizes obstacles and analyzes the environment in real time. The 3DAdapt™ obstacle avoidance system significantly reduces the risk of collisions, prevents the robot from getting stuck, and allows it to smoothly avoid furniture, cables, and other objects on the floor. It is an intelligent response to changing conditions in the home and greater reliability during each cleaning cycle.

No more problems with hair and pet hair

A specially designed anti-tangle system allows the robot to handle both hair and pet hair with ease. The U-shaped side brush effectively untangles hair and directs it into the robot. The V-shaped main brush precisely collects dust, crumbs, and debris from carpets, crevices, and hard floors. The whole thing is complemented by an innovative airflow system with an anti-tangle comb, which creates a strong airflow, minimizing hair wrapping around the roller and preventing the dust container from clogging.

Vacuuming and mopping in one cycle

The integrated 2-in-1 design allows you to vacuum and mop at the same time, without the need to manually change the operating mode. The robot has a 330 ml dust container and a 245 ml water tank with three-stage electric water dispensing control. The system maintains a constant moisture level in the cloth, which translates into effective floor cleaning without streaks, excessive wetting, or unpleasant odors.

Long operating time and full control with the app

The built-in 3200 mAh battery ensures a long cleaning time on a single charge, allowing for effective cleaning of larger areas. The robot can be conveniently controlled using an intuitive mobile app that allows you to adjust operating modes, suction power, moisture level, schedules, and cleaning time.

Voice control and work summary

After each cleaning cycle, the app provides clear information about the robot's performance, and the cleaning results are available immediately after the session is complete. All key data on the robot's performance is always at your fingertips, giving you full control over keeping your home tidy. In addition, the MOVA E20s Pro supports voice control and works with popular platforms such as Google Home, Siri, and Amazon Alexa for maximum convenience.

Included

- cleaning robot
- charging station
- side brush
- mop pad
- user manual

Manufacturer	MOVA
Model	E20s Pro
Color	White
Product dimensions	320 x 320 x 96 mm
Weight	2.8 kg
Maximum suction power	13,000 Pa
Battery capacity	3,200 mAh
Water tank capacity	245 ml
Dust container capacity	330 ml

Dust bag capacity	4L
Threshold crossing	Thresholds up to 18 mm high
Main brush	V-shaped brush
Mop type	Flat
