Aprašymas

MOVA P10 Air Purifier

The MOVA P10 is an advanced air purifier designed for homes with pets. The device uses a unique dual filtration system that simultaneously removes pet hair, allergens, fine particles, and unpleasant odors. Thanks to a combination of mechanical and electrostatic filtration and active allergen decomposition technology, the MOVA P10 ensures cleaner air, longer filter life, and high comfort in everyday use.

Dual filtration system designed for pet owners

The two-stage filter architecture used in the MOVA P10 effectively separates the purification tasks. The high-efficiency composite upper filter captures pollen, allergens, bacteria, viruses, and gaseous pollutants such as odors and formaldehyde. The low-flow-resistance lower filter is specifically designed to capture hair and larger particles, preventing clogging of the main element.

Dual-zone airflow for effective hair capture

The MOVA P10 uses a dual-zone air intake system that effectively captures both airborne hair and hair that has fallen to the floor. The side inlets generate a powerful upward airflow that captures airborne debris in the room. The bottom inlet operates in 360° mode, creating an intense airflow at floor level, exactly where pets spend most of their time. This ensures that fallen hair and allergens are quickly captured.

Effective odor removal with Active Mineral technology

The purifier uses Active Mineral technology, which does not mask odors but breaks them down at the molecular level. The oxidizing material actively neutralizes difficult compounds such as ammonia and hydrogen sulfide, ensuring long-lasting and stable deodorization. This solution is up to 50% more effective at removing odors, which translates into long-lasting freshness in your home.

Professional protection against allergens

The MOVA P10 purifier is equipped with a HEPA H13 filter with an allergen-decomposing coating. The device captures particles $\geq 0.3 \mu\text{m}$ in size and actively breaks down allergen proteins from animal hair, pollen, and dust mites. This approach reduces allergy symptoms and provides stable respiratory protection, even with prolonged use.

Practical, hygienic solutions for everyday use

A disposable electrostatic cotton pre-filter allows for quick and hygienic removal of accumulated pet hair. Once full, simply peel it off and throw it away, without having to wash it or come into contact with dirt. This design facilitates maintenance of the device and prevents secondary contamination of the purifier's interior.

Modular design tailored to the interior

The purifier is equipped with a magnetic, replaceable cover – if necessary, you can easily remove it and install another one. The materials used are resistant to scratches, moisture, and dirt, which is great for homes with pets. An additional advantage is the upper platform, which serves as a comfortable resting place for your cat.

Safe and intuitive use

The purifier features a pet-proof lock and a reinforced, bite-resistant power cord. In addition, smart lighting indicates the air quality in the room, allowing you to quickly assess the current conditions.

Manufacturer	MOVA
Product name	MOVA Puris P10 Pet Purifier
Model	P10
PCADR	380 m ³ /h
Power	36 W
Filter	HEPA H13
UV sterilization	Yes
Plasma	Yes
App control	Yes
Fan speed levels	3 levels / Auto mode
Device dimensions	Ø260 × 610 mm
Weight	5.1 kg

GPSR Link: https://psr-assets.innpro.pl/small_appliances/sg_small_appliances_heating_and_air_conditioning.pdf, Gross weight: 8830, Net weight: 5000, Box length: 34,00, Box width: 34,00, Box height: 71,00

Techninė specifikacija

Matmenys ir svoris	
Matmenys (I × P × A)	34,00cm × 34,00cm × 71,00cm
Svoris	8,83kg
