Aprašymas

MOVA M50 Pro cordless upright vacuum cleaner with mop

If you want cleaning to be quick, convenient, and truly effective, the MOVA M50 Pro fits the bill perfectly. This device vacuums and mops floors in a single pass, handling both everyday dust and tougher dirt without bending over or constant adjustments. Intelligent sensors automatically adjust the mode of operation to the situation, and precise edge cleaning and easy maneuvering under furniture ensure that every corner of your home is tidy. Comfort is ensured by clear messages, hygienic solutions that facilitate cleaning of the device, and quick drying of the brush, so that everything is ready for the next use. The whole thing is complemented by a long operating time, which allows you to clean your entire apartment or house in one go – without rushing and without interruptions.

Vacuuming and mopping in one go

The MOVA M50 Pro combines powerful 22,000 Pa suction with active floor scrubbing at a pressure of up to 20 N, easily removing dry dirt, spilled liquids, and dried-on grime. This is the solution for people who expect visible results after just one pass – without the need for corrections and without compromising between convenience and effectiveness.

Power that goes deeper

With its impressive suction power, the M50 Pro can handle both surface dirt and dirt deeply embedded in the floor structure. The device effectively collects dust, sand, crumbs, and pet hair while actively washing the floor. This combination makes cleaning faster, more thorough, and more predictable – whether you're cleaning laminate, tile, or floors in high-traffic areas.

Zero shortcomings

EdgeCoverage™ AI technology is responsible for truly gap-free edge cleaning. The intelligently extending arm reaches directly into the corner where the floor meets the wall, eliminating the problem of uncleaned strips along the baseboards. When reversing, the device simultaneously collects dirt and vacuums up water, leaving only minimal traces of moisture on the floor and allowing the surface to return to full usability more quickly.

Complete freedom of movement and cleaning under furniture

The 180° flat layout technology allows you to effortlessly slide the vacuum cleaner under furniture as low as 14 cm without losing suction power or cleaning efficiency. In addition, the flexible 90° rotation range makes maneuvering the device smooth, even in tight spaces and complex room layouts. Cleaning corners, edges, and hard-to-reach places becomes intuitive and less tiring.

Intelligence that works for you

The MOVA M50 Pro uses an intelligent algorithm-based system that adjusts operating parameters in real time to the type of floor and how it is used. The built-in dirt sensor recognizes the level and nature of dirt, automatically adjusting the suction power and amount of water used in smart mode. The new support wheel reduces resistance when maneuvering the device, and the optimized design and weight of 610 allow for comfortable cleaning with minimal effort.

Hygienic and easy maintenance

The MOVA M50 Pro is designed to make daily maintenance as convenient as cleaning itself. The waste water tank uses a solid and liquid waste separation system, which makes it much easier to empty and clean after use. Dirt, hair, and other debris do not mix with the water, making maintenance faster, more hygienic, and requiring no direct contact with waste.

Full control over the equipment

A clear LED display and voice prompts provide constant access to key information during cleaning. The device keeps you informed about its operating status, cleaning mode, and any service requirements, so you always have full control over the cleaning process. This solution increases user comfort and eliminates guesswork — everything is clear and easy to understand.

Uninterrupted cleaning of up to 350 m²

Thanks to its powerful battery, the MOVA M50 Pro offers up to 46 minutes of continuous operation on a single charge. This is enough to thoroughly clean even a large apartment or house with an area of up to 350 m² without having to interrupt your work to recharge. Consistent performance and long operating time make cleaning smooth and tailored to the needs of larger spaces.

Included in the set

- main body
- handle
- base station
- replaceable filter
- spare roller brush
- cleaning brush
- 500 ml cleaning solution
- user manual

Manufacturer	MOVA
Model	M50 Pro
Vacuum cleaner dimensions	256 x 275 x 1180 mm (without station), 332 x 320 x 1240 mm (with station)
Suction	22,000 Pa
Rated power	450 W
Battery capacity	6 x 4000 mAh

Weight	5.4 kg
Operating weight	~ 610 g
Height in lying position	14 cm, including 10 cm brush head
Cleaning modes	Smart mode, max mode, suction mode
Self-cleaning temperature	90°C
Hot air drying temperature	90°C
Drying noise	59 dBA (quiet drying), 72 dBA (fast drying)
Clean water tank	800 ml
Waste water tank	700 ml
Operating time	46 minutes
Automatic dirt detection	Yes
