Aprašymas

MOVA E50 Pro Ultra Robot Vacuum

The MOVA E50 Pro Ultra is an advanced cleaning robot with a docking station that offers high suction power of 30,000 Pa, effective mopping with 12 N of pressure, and nearly fully automatic operation. With mops rotating at up to 260 rpm and the MaxiReach™ extension system, the device thoroughly removes both everyday dust and dried-on dirt. Its slim 97 mm profile allows it to clean under furniture with ease, while precise LDS navigation and 3D structured light ensure smooth movement around the home. The Pro Ultra model also stands out with additional features, such as automatic detergent dispensing and mop pad cleaning with hot water at 100°C.

30,000 Pa suction power – effective cleaning every day

The TurboForce™ motor generates a suction power of up to 30,000 Pa, allowing it to effectively remove dust, pet hair, sand, and larger debris from hard floors and carpets. There are 5 power levels to choose from, allowing you to adjust the robot’s performance to the type of surface and the level of dirt. The V-shaped rubber main brush effectively collects debris without spreading it, and the optional CleanChop™ brush with a self-cutting mechanism further reduces the need for manual cleaning.

Mopping with 12 N of pressure and a speed of up to 260 rpm

TurboScrub technology uses two mopping pads that rotate at speeds of up to 260 rpm and press against the floor with 12 N of force. This combination effectively removes dried-on stains and stuck-on dirt, ensuring thorough cleaning without the need for manual scrubbing. What’s more, the mops can lift up to 10.5 mm, which protects carpets from getting wet and ensures perfect cleaning results on various surfaces.

MaxiReach™ – thorough cleaning along edges

Thanks to MaxiReach™ technology, the mop pad can extend and effectively reach areas that are often missed by standard robots. The MOVA E50 Pro Ultra effortlessly cleans along walls, baseboards, and furniture, increasing edge coverage by up to 99%. This ensures that dust and dirt are removed even from hard-to-reach areas, without the need for manual touch-ups.

Triple Anti-Tangle System

The robot is equipped with three mechanisms to prevent hair and pet hair from getting tangled. The special design of the omni-wheel with stiff bristles reduces hair tangling, the improved side brush minimizes the risk of tangling, and the optional CleanChop™ brush automatically cuts through tangled strands. Forget about tedious manual cleaning!

Multifunctional station – fully automated cleaning

The E50 Pro Ultra is equipped with an advanced docking station that handles most maintenance tasks. It automatically empties the dust bin into a 3.2-liter bag, allowing for up to 100 days of maintenance-free operation. The JetSpray Dryboard™ system with 20 spray nozzles and hot water pad washing at 100°C effectively removes dirt and helps maintain a high level of hygiene. Additionally, the station automatically dispenses detergent, refills the mopping water, and dries the mops with hot air at 63°C in about 1 hour.

Smart carpet cleaning

Using the app, you can specify the type of carpets in your home, and the robot will automatically adjust its cleaning mode accordingly. It will increase suction power on low-pile carpets, while avoiding the area when mopping high-pile carpets. This allows for effective vacuuming of textile surfaces without the risk of getting them wet.

Precise navigation and convenient control

LDS navigation scans rooms in a 360° range, quickly creating accurate maps and planning efficient cleaning routes. The front line laser helps avoid obstacles and reduces the risk of collisions, while the slim design (only 97 mm high) allows for easy cleaning under furniture such as sofas or beds. You also have access to an app that lets you remotely monitor cleaning, review cleaning history, and conveniently control the robot.

Perfect for large areas

The 5200 mAh battery ensures long runtime, allowing for effective cleaning of both smaller apartments and larger homes. Meanwhile, the station’s large tanks (5 L for clean water, 4.5 L for dirty water) allow the robot to clean an area of up to 553 m² without needing to manually refill the water. This is a practical solution for those who expect maximum convenience and minimal maintenance.

Included

- Cleaning robot x1
- Docking station x1
- Main brush (pre-installed) x1
- Side brush (pre-installed) x1
- Cleaning base filter (pre-installed) x1
- Dust bag (pre-installed) x1
- Dust container (pre-installed) x1
- Dust bin filter (pre-installed) x1
- Docking station ramp extension x1
- Automatic detergent dispenser module (single-chamber, pre-installed) x1
- Mopping pad (pre-installed) x2
- Mop pad holder x2
- User manual x1

Manufacturer	MOVA
Model	E50 Pro Ultra
Navigation system	LDS
