Aprašymas

MOVA K30 Lite Upright Vacuum Cleaner

Daily cleaning can be quick and truly effective—whether there are crumbs scattered on the floor, spilled drinks, pet hair, or dried-on dirt. The MOVA K30 Lite offers 18,000 Pa of suction power, a floor-cleaning function, a design that operates completely flat at a 180° angle, a steering assist system, and a lightweight build—weighing just 4.2 kg. Up to 30 minutes of runtime on a single charge allows you to clean an area of up to 240 m², and thoughtful features—such as edge cleaning on both sides of the brush, a self-cleaning roller, and smart notifications—ensure added convenience.

Power That Handles Stubborn Dirt

The brushless motor, generating 18,000 Pa of suction power, effectively removes both dry debris and spilled liquids or stubborn stains that require more intensive cleaning. Its high power allows it to quickly pick up dust, crumbs, hair, pet hair, and other debris without having to go over the same surface multiple times. At the same time, the device operates relatively quietly—the noise level does not exceed 76 dB(A).

It reaches places where traditional vacuums can't

One of the MOVA K30 Lite's greatest advantages is its 180° Lie-Flat design, which allows the device to lie completely flat. The pivot axis works in conjunction with a system that maintains effective suction power even when operating in this position, allowing the vacuum cleaner to easily reach under beds, wardrobes, sofas, and other low-lying furniture. The Liquid Locking System makes it easy to clean hard-to-reach areas without sacrificing effectiveness, effectively removing dust, hair, crumbs, and other debris that accumulate there every day.

Clean floors right up to the edges

Dust very often accumulates along walls and baseboards, where standard brushes leave a strip of dirt behind. The MOVA K30 Lite features a Dual-Edge Cleaning design, allowing the brush to clean from both sides and reach right up to the edges with a 0 mm gap. This allows it to effectively remove dirt along walls, around furniture, and in corners, ensuring evenly clean floors.

A brush that cleans itself

Once cleaning is complete, you don't have to spend time manually removing dirt from the roller. The self-cleaning function uses bidirectional brush rotation—alternating forward and backward rotations simulate manual scrubbing, thereby more effectively removing stubborn dirt. The system is complemented by a special comb-style scraper that separates hair from the roller during operation and prevents it from getting tangled in the mechanism, helping to keep the brush in optimal condition. As a result, the device is ready for the next cleaning session faster, and daily maintenance takes significantly less time.

Lightweight design and a drive system that assists with cleaning

The device weighs about 4.2 kg, making it easy to move between rooms and floors. Comfort is further enhanced by the Self-Propelled Power Traction system—the rotating brush generates forward thrust, making it much easier to maneuver the device. The integrated water tank lowers the center of gravity, improving stability and control during maneuvering.

Longer cleaning sessions without unnecessary interruptions

The battery, consisting of 7 cells with a total capacity of 2600 mAh, provides up to 30 minutes of operation in standard mode. This energy reserve allows you to clean an area of up to 240 m² on a single charge, minimizing the need to interrupt your work. It takes up to 5 hours to fully charge the device. The 600-ml clean water tank allows you to mop floors without frequent refills, while the dirty water tank holds 500 ml during standard operation and approximately 350 ml when cleaning in the 180° position.

Smart features that make every step of cleaning easier

The MOVA K30 Lite provides real-time updates on its operation via indicator lights and audio signals. You'll receive information about the battery level, cleaning progress, and any system alerts, making the device intuitive to use.

Hygienic, mess-free tank emptying

Once the cleaning cycle is complete, emptying the dirty water tank is quick and hassle-free. The built-in filter separates solid debris from liquids, making it easier to dispose of waste and helping to prevent drain clogs. This solution enhances the hygiene of daily maintenance and makes keeping the vacuum cleaner clean just as convenient as the cleaning itself.

Included:

- Vacuum cleaner body
- Handle
- Charging station
- Cleaning brush
- Power adapter
- User manual

Manufacturer	MOVA
Model	HMH21A
Battery capacity	2600 mAh
Suction power	18,000 Pa
Clean water tank capacity	600 ml
Dirty water tank capacity	500 ml in vertical position / 350 ml in horizontal position

Operating time with mopping	Up to 30 min
Self-cleaning function	Yes
Features	180° Lie-Flat design, Dual-Edge edge cleaning, self-cleaning brush with bidirectional rotation, comb-style scraper to prevent hair from getting tangled in the mechanism, steering assist, separation of solid and liquid debris, indicator lights and audio alerts
Charging time	Approx. 5 h
