Aprašymas

MOVA Turbo 20 Hair Dryer (White)

Morning routines, a quick touch-up before heading out, or styling your hair before an important meeting don’t have to take a long time. The MOVA Turbo 20 combines a brushless motor running at 110,000 RPM, airflow reaching 65 m/s, and an air volume of 55 m³/h, allowing it to dry hair efficiently while protecting its health thanks to intelligent temperature control at 57°C and the emission of 200 million negative ions per cm³. Its lightweight design (330 g, not including the cord), quiet operation (58 dB), and included accessories make it ideal for both everyday drying and precise styling.

Maximum power that reduces drying time

The MOVA Turbo 20’s performance is driven by a brushless motor reaching 110,000 RPM. Combined with an optimized air channel design that minimizes airflow resistance, it generates a powerful and even airflow at a speed of 65 m/s and a volume of 55 m³/h. The air effectively reaches from the roots all the way to the ends of your hair, ensuring efficient drying so you can move on to the next steps of your hair care or styling routine faster.

Smart Temperature Control

Fast drying doesn’t have to mean exposing your hair to excessive heat. The MOVA Turbo 20 uses an NTC sensor that monitors the temperature up to 200 times per second. The system constantly maintains an optimal temperature of 57°C, reducing the risk of overheating your hair and helping to protect its structure.

200 million negative ions for smooth, shiny hair

While drying, the MOVA Turbo 20 emits as many as 200 million negative ions per cubic centimeter. These ions neutralize static electricity, help close the hair cuticles, and support moisture retention within the hair’s structure. The result is smoother, softer, and shinier hair that’s easier to style and stays looking great all day long. Regular use of this technology also helps protect your hair while blow-drying.

Quiet operation, greater comfort

High performance doesn’t have to mean loud operation. The MOVA Turbo 20 features a 10-layer noise-reduction design and an optimized airflow system that minimizes vibration and friction. As a result, the noise level is only 58 dB, so you can dry your hair at any time of day.

A lightweight design you’ll appreciate every day

The hair dryer’s body weighs just 330 g (without the cord), so even extended styling sessions won’t put excessive strain on your wrist. The device fits securely in your hand and is perfect for travel. Its lightweight design is paired with an elegant, glossy finish that gives the hair dryer a modern and stylish look, making it a great addition to your bathroom shelf.

Customize the drying settings to suit your hair

The MOVA Turbo 20 lets you easily adjust the settings to your hair type and current needs. It offers two airflow speed levels and four temperature settings—cool air (25°C), warm air (57°C), hot air (80°C), and a mode that circulates both natural and hot air. This gives you a total of eight possible setting combinations, allowing you to easily transition from gentle drying to intense styling. Operation is made easy by buttons and LED indicators that show the selected mode.

Two attachments, even more styling possibilities

The set includes two practical attachments made of heat-resistant materials, ensuring they retain their shape even during intensive use. The diffuser helps accentuate the natural curl of your hair, increase its bounce, and preserve its natural shine. The concentrator, on the other hand, directs the airflow exactly where it’s needed, facilitating precise styling, sectioning, and styling hair of varying lengths. The attachments’ sturdy construction ensures durability and consistent styling results.

A filter that ensures the device’s performance

The dual intake filter is designed for long-lasting, trouble-free operation. It is washable, easy to keep clean, and effectively traps residues from styling products such as hairsprays and gels. Regular cleaning of this accessory helps maintain optimal airflow and supports the hair dryer’s long-term performance.

Included:

- Hair dryer
- Diffuser
- Concentrator
- User manual

Manufacturer	MOVA
Model	Turbo 20
Motor type	Brushless
Ionization	Yes
Operating modes	4 temperature settings, 2 speed settings
Temperature control	Yes
Airflow	65 m/s
Weight	330 g (without power cord)
Noise level	≤58 dB
