Aprašymas

10/100/1000Mbps Ethernet | USB Type-C to 3x USB Type-A | USB 3.2 Gen 1 (5Gbps) | 1ft (30cm) Built-In Host Cable

This USB-C Hub with Gigabit Ethernet adds three USB-A 3.2 Gen 1 (5Gbps) ports and one Gigabit Ethernet port to a USB-C enabled computer. The bus-powered USB Hub connects to a USB-C port on a laptop computer, using the built-in 1 ft. (30 cm) host cable. This USB hub is compact in size, facilitating portability when travelling.

Gigabit Ethernet

The USB hub features a Gigabit Ethernet adapter. The Ethernet controller is compatible with the IEEE 802.3u/ab standards and supports Wake-on-LAN (WoL), Jumbo Frames, and V-LAN Tagging. The network adapter enhances laptop network reliability, security, and performance, by utilizing wired 10/100/1000Mbps Ethernet.

Connect up to Three USB-A Devices

The 3-port USB 3.2 Gen 1 (5Gbps) Hub adds three USB-A ports by connecting to a single USB-C port. The USB hub is backward compatible with USB 2.0 (480Mbps) devices, ensuring support for a wide range of modern and legacy USB peripherals (e.g., external storage devices, thumb drives, HDDs/SSDs, HD cameras, mice, keyboards, webcams, and audio headsets).

The USB Hub is bus-powered. It draws up to 15W of power from the USB-C host computer. Each downstream USB-A port is capable of providing up to 4.5W (5V/0.9A) of power to the connected peripherals. For added protection to connected USB devices, the USB ports feature Overcurrent Protection (OCP). OCP prevents USB peripherals from drawing more power than is safely allocated for the port.

Plug and Play

This device is compatible with all major operating systems, including Windows, macOS, ChromeOS, iPadOS, and Android. The Hub is automatically detected and configured upon connection to a host computer. This ensures automatic installation and setting configuration with any USB-C laptop, including Thunderbolt 3, Thunderbolt 4 and USB4 computers such as Apple MacBook (Intel/M1/M2), Lenovo X1 Carbon and Dell XPS. The built-in extra long 1 ft. (30 cm) USB-C host cable ensures easy setup and reduces connector strain on 2-in-1 devices such as the Surface Pro 7, iPad Pro, HP Elite X2 and laptops on riser stands.
