Ensure optimal performance with this practical fiber optic cleaning pen, designed for 1.6mm MIL-DTL-38999 (D38999) fiber interfaces. It provides quick, effective cleaning for reliable signal quality in critical network environments.

Maintain Clean Fiber Connections

This Fiber Optic Cleaning Pen effectively removes dust and particles to prevent contamination that can compromise connection reliability and signal quality. Because optical fiber is highly sensitive to contamination, keeping fiber ends clean is essential for maintaining consistent performance, especially in high-bandwidth connections where even minor particles can disrupt signal integrity.

Quick and Simple Operation

Cleaning fiber connector ends is simple with the intuitive one-click mechanism. Each press advances the cleaning belt to wipe away contaminants from the connector end face, ensuring a fresh cleaning surface with every use.

For Professional Fiber Installations

This Optical Fiber Cleaning Pen is suited for fiber optic network maintenance, server racks, and data centers. Its compact, lightweight design is ideal for technicians working with high-density fiber setups, including patch panels and transceivers.
