Pagrindinės savybės

- ✓ With the WLAN socket, electrical consumers such as standard lamps can be actuated easily via app or voice control, e.g. switched on and off at certain times
- ✓ Power consumption monitoring of the connected device via an app
- ✓ Simple installation on your own WiFi network: since no hub is required, your devices can be set up in just a few minutes
- ✓ High compatibility: works with Amazon Alexa, Google Assistant, iOS and Android. Can also be connected to all Alex and Google Assistant-compatible smart home products from other manufacturers
- ✓ The perfect start: the smart socket is ideal for intelligently upgrading an apartment or house, but also for supporting people with physical disabilities
- ✓ Light chain, standard lamp, TV etc. can be switched on and off at set times, but also create groups or scenes using the devices integrated into your WLAN
- ✓ This means that you can save energy with the targeted control of electrical consumers, including - usefully - while out and about, if you have forgotten to switch the light off. That's because you are always kept up to date about the current status of the equipment via the app or push notification
- ✓ With increased protection against accidental contact
- ✓ Your data is stored exclusively on German servers

Aprašymas

- Our WLAN socket works without any gateway (hub): you don't need an additional device, and you save on extra costs since the socket establishes a direct WiFi connection to the router
- Step by step to the Smart Home: with the Hama Smart Solution app, you can expand and network your smart home with any number of Hama Smart Home products
- Whether it be the sofa or the sun lounger: with the Hama Smart Solution app, you can control your WiFi socket from anywhere and you have control over all the devices connected to it at all times
- Whether it be Amazon Alexa or Google Assistant: conveniently control the devices that are connected to the Smart Home sockets via spoken commands

Techninė specifikacija
