Aprašymas

DESCRIPTION

The ACT Industrial sensor cables (actor cables) are provided with a TPE (Thermo Plastic Elastomer) sheath and are therefore highly resistant to mechanical loads such as movements in a chain. The connectors are overmoulded TPE and degree of protection is IP67. Superflex SF/UTP cable, each individual core consists of 28 strands of copper that together form a diameter of AWG26. This makes the cable more flexible than, for example, a standard AWG24/7 patch cable. Stranded conductors are build up of uninsulated thin strands of wire twisted together. How greater the number of strands in a stranded conductor, the greater the flexibility of the wire.
