Aprašymas

The ACT IEC dual lock power cable offers dual locking (C13+C14) with a unique connector on the PDU side, locking at the top and at the side, which makes the cable extra protected against accidental disconnection in the PDU. In short, even more security. The locking mechanism is universal and works with all known brands of PDUs.

The IEC lock prevents undesired disconnection/release of the cable both on the equipment side and on the PDU side, thus minimizing the risks of damage and downtime.

The IEC lock is applicable in Europe, Australia, (10A/250V~) America, Canada and Japan (15A/250V~).
