USB-C connector for easy connection of your headset, and that's not all.

FASTER CHARGING AND HIGHER TRANSMISSION SPEED

Even faster charging and higher transmission speeds. We have equipped our VR cables with USB type A and C (3.2 Gen 1) connectors. What does this mean in practice? The ability to charge at up to 15W (using the charger) and a transfer rate of up to 5 Gbps. Low latency and signal stability? These will become standard from now on.

WITH CONVENIENCE IN MIND

Complete convenience - that's what using the GENESIS VR cable provides. It is not without reason that we equipped them with an angled USB connector allowing easy connection, but also two Hook & Loop tape, which you will find in the set. They will make it easier to mount the cables to the goggles in such a way that none of the elements interfere with your dynamic movements. Their length of 3 meters is also not insignificant. Thanks to it, you do not have to worry about full freedom during use.

EVEN GREATER DURABILITY

Frequent use of VR goggles can expose your cable to abrasion and damage. With GENESIS VR cables you don't have to worry about that. When designing them, we made sure that they will serve you for as long as possible. This will be made possible by strong aluminum connectors with extended rubberization to minimize the risk of breakage, durable and flexible braid that protects against abrasion, suitable for dynamic use.

FULL COMPATIBILITY

Our VR cables are not only compatible with Oculus Quest 2, Meta Quest 3. You can also use them to connect other VR headsets, compatible accessories and even charge your laptop without worry. One cable, multiple devices. With GENESIS, it's really easy.
