Aprašymas

Product in 120mm version. We recommend mounting in the panel base 6920075778151 (sold separately). Please verify the dimensions for proper installation before purchase.

SONOFF NSPanel-US smart WiFi control panel (black, 120mm)

SONOFF NSPanel-US is an advanced control panel that integrates HMI control, smart temperature control and smart switch functions. It allows you to centrally manage your home appliances, adjust the ambient temperature and activate selected scenes with a single touch. From lighting, air conditioners and heating, to curtains or motorized blinds, this panel takes smart home comfort to the next level.

Full one-touch automation

NSPanel-US is a comprehensive control system that allows you to manage multiple devices from a single screen. Smart lighting, temperature control and scenario functions are all available in an intuitive way. Set your preferred scenes for work, sleep or movie screening and activate them with the touch of a finger.

Versatile control options

NSPanel offers a variety of control options. Close distance is convenient touch control with the HMI and dual wall switch. Medium distance, that is voice control using assistants such as Alexa, Google Assistant or Alice. Long distance allows remote management via the eWeLink app, even when you are away from home.

Personalized scenarios

Dreaming of the perfect lighting and temperature while you work or rest? NSPanel allows you to create scenarios tailored to your needs. With one click, you can switch from movie-watching mode to sleep mode, activating all your preferences in seconds.

Individual and group control

The panel allows you to control your devices individually or in groups. Turn on one light for relaxation or all of them to greet guests. NSPanel offers complete freedom to customize your home to suit your lifestyle.

Smart temperature management

With a built-in thermostat and environmental sensors, NSPanel automatically regulates the room temperature. Set your preferred conditions and forget about extreme temperature fluctuations. Manual mode allows you to adjust the temperature on the fly, while automatic mode ensures optimal conditions at different times of the day.

Full control with the eWeLink app and easy-to-read display

By working with the eWeLink app, you can monitor and control your home from anywhere in the world. Automatically turning off lights at a certain time or remotely managing appliances has never been easier. The panel displays up-to-date information on weather, Wi-Fi status, time, date, as well as indoor and outdoor temperature. All the necessary data is always at your fingertips.

Compatibility with multiple devices and dual buttons

NSPanel is compatible with a wide range of SONOFF devices, including LED strips, smart bulbs, sockets and switches. Thanks to its compatibility with Philips Hue lighting, you have full control over color, color temperature and brightness. In addition to its advanced features, the panel also offers two physical buttons to control your most frequently used devices. This feature makes the NSPanel extremely practical for everyday use.
