Aprašymas

DDPAI E3 Wi-Fi 2K + 1080p dash cam

Make sure you capture what happens on the road with the DDPAI E3 dash cam, which features a front camera with 2K resolution (2560 × 1440 pixels) and a rear Full HD camera (1920 × 1080 pixels). Both cameras allow you to document your journey from two perspectives, providing footage that is useful for analyzing traffic incidents. The front lens offers a 120° field of view, while the rear lens covers 128°, allowing you to record a wide area in front of and behind the vehicle.

Large touchscreen and user-friendly operation

The dashcam is equipped with a 9.35-inch color LCD screen with a resolution of 1920 × 480 pixels. The touchscreen interface allows you to conveniently switch between front and rear camera views, review recorded footage, and adjust the device’s settings. You can also adjust the screen brightness and take photos directly from the display, keeping the most important features easily accessible.

Wi-Fi connectivity and the DDPAI app

Built-in 2.4 GHz Wi-Fi allows you to connect the dashcam to your smartphone using the DDPAI app. This gives you the ability to view live footage from both cameras, play back recordings, and download selected files to your phone. It’s a practical solution when you want to quickly review a recorded incident or save specific footage without having to remove the memory card from the device.

Loop recording and G-sensor

Support for microSD memory cards with capacities up to 256 GB and the loop recording feature allow for continuous recording of your route without having to manually delete older files once the storage is full. The built-in three-axis G-sensor detects G-forces, allowing you to record events related to sudden changes in the vehicle’s movement. As a result, the dashcam provides practical support for documenting your daily trips.

Fitting into the car interior

The front camera can be mounted on the factory rearview mirror using the included mounts, and then adjusted to the appropriate recording angle. The rear camera allows you to expand the recording area to include the space behind the vehicle, and the included extension cable makes it easy to connect. The 264 × 74 × 40 mm housing integrates the camera with a large screen, providing access to the live view and settings in one place.

Included in the set

- Front camera
- Rear camera
- Car charger
- Front camera power cable
- Rear camera extension cable
- Mounting tool
- Mounting straps
- User manual

Manufacturer	DDPAI
Model	E3
