Aprašymas

Beyond the Screen. Made for Game Art.
Discover worlds the way they were meant to be seen.

MOBIUZ for Game Art: Your Game, a Masterpiece.
Flip through an artbook from Elden Ring, Horizon Forbidden West, or Tears of the Kingdom — every stunning landscape and ruin reflects the soul of game art. BenQ Colour Lab preserves this vision with exclusive colour tuning, keeping visuals vivid, immersive, and true to the artist’s intent—on screen and in print.

MOBIUZ knows Game Art. Loaded with studio-grade Spectral Colour and true-to-life Pixel Contrast, plus 120+ custom colour profiles from the Color Shuttle Game Art Database — all tuned for your favourite games.

OLED Brilliance and Intelligent Burn-In Protection

Powered by 3rd Gen QD-OLED with a Tandem Structure, this display delivers insane contrast and lifelike visuals. EX271QMZ features industry-standard graphene film for heat dispersion and is bolstered by the Intelligent OLED Protection Suite, where Pixel Refresh, Idle Dimmer, and Pixel Shift proactively prevent uneven wear that leads to burn-in. The EX271QMZ is further enhanced by Brightness Flow for stable brightness performance.

240Hz Standard: Top-Tier Gaming, We've Got You Covered

240Hz delivers stunning visuals with smooth motion. This high refresh rate reduces motion blur and input lag, providing gamers with a competitive edge and immersive experience. Combined with sharp detail and fluid gameplay, it's the ultimate upgrade for serious players.

Exclusive Spectral Colour: Made to Reveal Every Hue of the Studio-Grade Visuals

BenQ Colour Lab stands as the market’s leading authority in colour calibration, while the MOBIUZ Gaming Monitor takes it further—delivering full-spectrum Spectral Colour with every nuance vividly visible. In your favourite games, every scene, character, and gear bursts with seamless, lifelike colour—just the way they were meant to be seen.

Exclusive High Pixel Contrast: Made to Capture Every Point of Light and Dark

With BenQ Colour Lab’s expert calibration, MOBIUZ High Pixel Contrast locally enhances every single pixel in your game scenes. Whether it’s the blazing sun or the darkest sewer, every detail remains crystal clear. Questing or exploring, enjoy every moment and feel truly part of the world around you.

Empowered by Color Shuttle: The Stronghold of Game Art Masterpieces

BenQ Color Shuttle leads the way in empowering Game Art. The Color Shuttle Database features 120+ colour profiles for top AAA titles, with more on the way. Players can upload, download, and enjoy Smart Game Art that adapts in real time—turning every game into more than just a game. It’s like flipping through an art book that leaves you wanting more.

Smart Game Art NOTICE: Due to some stricter in-game anti-cheat mechanisms, the Smart Game Art function may be unavailable. To complete your game art journey and immersive experience, we provide game-specific colour profiles that you can apply directly on the Color Shuttle website.

Colour Modes Based on Game Art Styles: Redefine How You See Your True World

We don’t classify colour modes by game genre—we know what truly matters is the Game Art Style. Developed through extensive testing and direct feedback from gamers, MOBIUZ has crafted Colour Modes Based on Game Art Styles that faithfully represent the three most iconic game worlds: Fantasy, Sci-Fi, and Realistic. From flames to stone, metal to strands of hair—the world you see is exactly where your heart belongs.

All You Need for FPS Excellence

MOBIUZ monitors feature Crosshair, FPS Counter, and Blur Reduction, providing an FPS-oriented boost for enhanced accuracy and performance in fast-paced gaming.
