Aprašymas

Pro features in a to-go package

Pro-level features for both still shots and movies will meet the demands of professional photographers, creators and vloggers.

Broad zoom range and superior speed performance

Inside its compact body the RX100 VII is packed with everything it takes to deliver gorgeous images. The 24-200mm2 zoom lens is complemented by 0.02-sec.3 super fast AF, new Real-time Tracking and Real-time Eye AF, plus enhanced image stabilisation and an external microphone jack for high-quality movie shooting.

Broad zoom capability in a compact body

The high-magnification 24-200mm2 zoom lens delivers superb image quality. Engineered to achieve maximum resolution and clarity across the entire zoom range, it brings remarkable telephoto capability to a pocket-size package, vastly expanding your options for creative expression.

Pocket-full of lenses

The ZEISS® Vario-Sonnar T* 24-200mm2 F2.8-4.5 zoom lens covers a broad span of zoom ranges equivalent to two standard zoom lenses (24-70mm and 70-200mm), all in a very compact configuration.

High-resolution optics

The camera's lens elements include four AA (advanced aspherical) lenses and two ED (Extra-low Dispersion) glass elements. These work together to achieve superb resolution right out to the periphery of the image, and throughout the telephoto range.

A new image sensor designed for speed

The newly developed, 1.0-type stacked CMOS image sensor and the latest BIONZ X™ image-processing engine open new dimensions in speed and image quality.

Fast, 20fps continuous shooting with highly accurate AF/AE tracking

The fast new image sensor offers continuous shooting at up to 20fps4, and the camera tracks subjects with AF/AE calculations at up to 60 times per second4, even when they're moving erratically or at high speed.

Blackout-free Shooting to keep you on track

Blackout-free Shooting5 lets you track your subject's movement without interruption on the camera's LCD display or viewfinder screen, with display updates performed at 60fps to minimise time lag.

(A) Blackout-free Shooting (B) Shooting with blackouts

New Single Burst Shooting function

The newly developed Single Burst Shooting6 function will capture even very fast-moving action, such as the precise instant a tennis racket hits the ball, taking seven shots in rapid succession with selectable speeds of 90fps, 60fps or 30fps. It allows you to capture decisive moments that might otherwise be very difficult, and it can be used with the self-timer. Both JPEG and RAW image formats are supported.
