Pagrindinės savybės

- ✓ Corner
- ✓ Proper use: Gaming
- ✓ Rectangular shape Table top material: MDF Frame material: Steel
- ✓ L-legs
- ✓ Height adjustment Cable grommets Cable management Bottle holder
- ✓ Black

Aprašymas

Have you long dreamed of a desk that fits you completely? Behold the GENESIS Holm Modular Corner - a desk designed for maximum comfort and personalization. Adjust the height, manage your cables, and if necessary - create a unique configuration using additional commercially available panels of different sizes (from 30 to 60 cm). It's all up to you.

A DESK TO FIT YOUR NEEDS

If you dream of expanding your workstation in the future, but don't want to replace your desk with a new one, the GENESIS Holm Modular will meet your expectations. This model is characterized by high functionality and full versatility, all thanks to dedicated, easily assembled side panels of different sizes, which you can buy separately. Forget about the inelegant joining and covering the top with a pad. We've made sure that connecting the panels to the fixed, center section is completely aesthetically pleasing. Do you need a custom size? Do you want to widen the desk on one side only? Or are you looking for a desk that will grow with your child's needs? No matter which option you choose, the GENESIS Holm Modular Corner will allow you to organize the space the way you want.
ONE RACK, MANY POSSIBILITIES
Upgrading your desk has never been so easy. When modifying the GENESIS Holm Modular, you don't need anything but the side panels. This is made possible by an extendable frame made of metal, which is a stable base for both 120 and 180 cm widths. That's right - you don't need to replace the frame. All you need to do is adjust its width to the mounted wings of the tabletop. In the GENESIS Holm Modular Corner set you will also find a dedicated corner set consisting of a tabletop and a leg. What is important - you can mount the exposed set on the left or right side. You can also easily disassemble it to create a classic straight top. It's trivial.

POWER OF REGULATION

You also do not have to worry about its height. Already at the assembly stage you can choose from 5 levels, thus defining the positioning of the tabletop between 70 and 90 cm. Thus, you can easily adjust it to your height, making the GENESIS Holm Modular Corner fully ergonomic. The dedicated cable shelf is also adjustable. You can extend it in the range of 50 - 95 cm, and thus adjust it to the dimensions of the entire tabletop. Its depth will make it easily accommodate even large surge strips.

DETAILS THAT MATTER

Sit back and see how enjoyable work and entertainment can become. GENESIS Holm Modular Corner is equipped with a number of functional extras. You no longer need to put your drink on the countertop. Placing it in a dedicated holder will prevent accidental spills. It is no different for headphones - thanks to a special holder they will finally have their place. You can easily change the position of both or hide them under the countertop. A special grommet accommodating the entire power plug will take care of aesthetics. You can easily pass the cable through it, and all this without affecting the appearance of your setup.

VIBE? WE KNOW SOMETHING ABOUT IT

Add flair to your work or gaming area with high-quality LED lighting. The mounted strip is more than just a classic backlight. Thanks to its distinctive design, it disperses the illumination much better, and on top of that you can fully adjust its angle or remove it completely, placing it in another place. Needless to say, you can easily change its mode of operation, right? This is the GENESIS Holm Modular Corner in its full glory.

Techninė specifikacija

Design	
Type	Corner
Table top shape	Rectangular shape
Table top material	MDF
Frame material	Steel
