In mission-critical environments, the switch ensures optimal performance through seamless switching, eliminating frame loss during transitions between connected source devices or different picture modes. It offers a cost-effective switch for different applications such as;

Digital Presentations
CCTV Surveillance & Control
Video Conference & Meeting rooms;
The switch allows independent switching between audio and video channels, offering flexibility in operation. This can be achieved by using the provided remote control or the front panel buttons, as well as RS-232 Control. Seamlessly transition between connected source devices, maintaining continuous use of a single audio source or monitoring a single video source while effortlessly switching to the other.
