Pagrindinės savybės

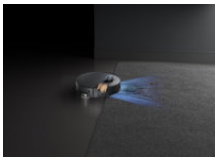

- ✓ Kombinuotas Juoda
- ✓ Drėgnas plovimas
- ✓ Automatinis pagrindo apsisukimas

Aprašymas

Dreame Aqua10 Ultra Track Complete Cleaning Robot (black)

The Dreame Aqua10 Ultra Track Complete is an advanced robot vacuum that vacuums with 25,000 Pa of suction power and thoroughly mops floors with hot water using the TrackSync™ system. The PowerDock™ station automatically empties the dustbin, washes the mop pads at 100°C, and dries them with hot air, ensuring a hassle-free experience. Thanks to the ProLeap™ system and innovative legs, the device can navigate thresholds up to 6 cm high, and the advanced OmniSight™ AI navigation allows it to recognize and avoid over 240 types of obstacles. A dual liquid dispenser, pet-friendly modes, and automatic water refilling let you enjoy a spotless home with no effort.

Unmatched suction power

Thanks to the Vormax™ system, the robot generates 25,000 Pa of suction power. So you can be sure it’ll handle any type of mess—from fine dust to cat litter, spilled food, or pet hair. Despite its high performance, the device doesn’t produce annoying noise. You can adjust the suction power in the app to tailor its operation to the surface and your current needs.

Special-Purpose Brushes

The Dreame Aqua10 Ultra Track Complete robot uses the HyperStream™ Detangling DuoBrush system, which combines a soft TPU rubber brush with a brush featuring soft bristles. This design effectively picks up debris from both hard floors and crevices as well as carpets, while preventing hair—even up to 50 cm long—from getting tangled. A specially designed airflow channel further lifts up pet hair and dust, increasing cleaning efficiency. Edges and corners are cleaned by the extendable SideReach™ side brush, which reaches along walls and baseboards, directing debris toward the main brush. The device effectively removes 100% of dust and up to 99% of pet hair.

Always Shiny Floors

The innovative TrackSync™ Constant Hot Water Mopping system ensures that the mop pads are continuously rinsed with hot water at a temperature of 35–45°C, and dirt, along with the water, is immediately directed into a separate tank, ensuring that cleaning is always performed using fresh water. As a result, the pads remain clean throughout the entire cleaning cycle and do not spread dirt, while the floors achieve a shiny, hygienic appearance free of streaks and unpleasant odors. The wide mopping pad presses evenly against the floor, and the pressure—three times greater than in traditional mopping systems—effectively removes even dried-on stains. From now on, every centimeter of your floor will be perfectly clean—regardless of the surface type.

Effortlessly Navigating Thresholds

The revolutionary ProLeap™ system allows the Dreame Aqua10 Ultra Track Complete to effortlessly handle thresholds and steps that pose a barrier to other robots. The device can climb thresholds up to 4.2 cm high, and in the case of double-layered thresholds, it can overcome obstacles up to 6 cm high. Thanks to its retractable “legs” and flexible arms, it doesn’t get stuck on baseboards, thick carpets, or door tracks. Additionally, the Triple-Wheel AgiLift™ chassis—featuring three adjustable wheels, silicone pads, and shock absorbers—ensures stability, dampens noise, and prevents moisture from being transferred to carpets. As a result, cleaning is smooth and thorough throughout the entire home.

Carpet Protection

You don’t have to worry about your carpets—the robot automatically raises or completely removes the mop pads when it approaches textile surfaces. On carpets, it increases suction power and passes over them twice, effectively pulling out dirt hidden deep within the fibers. If you enable mopping mode, the robot can completely skip carpets and focus on cleaning hard floors.

Smart Navigation and Obstacle Avoidance

The OmniSight™ AI Navigation system combines two AI cameras (160°; 1600×1200), a 3D StereoEdge™ side-mounted structured light sensor, and LED lighting. The system recognizes over 240 types of objects with 1-mm accuracy—from cables, dark objects, and toys to flat sheets of paper and transparent bags—and plans a collision-free route. The StereoEdge™ sensor on the right edge detects obstacles from a distance of up to 6 m,

eliminating blind spots near walls and cables. Importantly, when the robot lowers its height in VersaLift™ mode and retracts the DToF sensor, it switches to OmniSight™, which creates an accurate 3D image of the surroundings and enables safe cleaning even under low furniture.

Clean Pads After Every Use

After each cycle, the robot returns to the docking station, where the mop pads are automatically rinsed and disinfected in water at 100°C, then dried with hot air. This process effectively dissolves grease and removes even stubborn dirt, while neutralizing bacteria and microorganisms. Thanks to ThermoHub™ technology, you can be sure that mopping is performed in a fully hygienic manner and that the clean floor won't get dirty again. After the cycle is complete, the station automatically refills the robot's water tank. If you connect it to a water supply, it will also fill and drain the water.

Hygienic dust storage system

The PowerDock™ station not only automatically empties the robot's dustbin but also dries the dust bag with hot air. This prevents moisture from accumulating inside, stops mold from growing, and eliminates unpleasant odors. The entire process is quiet and energy-efficient, so it doesn't disrupt your daily routine. The bag's large capacity allows for up to 100 days of use without needing to be emptied.

Dual detergent system

The docking station features the Dual-Solution Compartment—two separate compartments for cleaning solutions. One is designed for daily floor cleaning, and the other for neutralizing pet odors. This allows the robot to automatically select the best solution for each situation and ensure perfect results.

The Perfect Choice for Pet Owners

Do you have a furry friend living in your home? The robot captures footage of your pet and automatically compiles it into a short vlog that you can easily download to your phone. Pet Voice Interaction offers voice effects for safe interaction. Based on your pet's behavior, the device also identifies Pet Activity Hotspots and performs additional cleaning in those areas. When you want to check where your pet is, turn on Pet Snaps—the Dreame Aqua10 Ultra Track Complete will locate your pet and take a photo of it.

Convenient Control

With the app, you gain full control over cleaning—from selecting modes and adjusting suction power to setting cleaning schedules. The robot also supports OTA updates and voice control (both built-in and via third-party assistants), making it a perfect fit for a smart home.

Included in the set:

- Cleaning robot
- Docking station
- Main brush x2 (one installed)
- Brush guard (installed)
- Side brushes x3 (one installed)
- Dust bin with filter (installed)
- Mopping pads x4 (one installed)
- Dual-Solution cleaning solution dispenser module (installed)
- Dust bag x5 (one installed)
- Base station filter
- Pet Odor Solution cleaning solution 200 ml x2
- Cleaning solution 1 L
- Base station ramp extension
- Cleaning tool
- Quick Start Guide
- User Manual

Manufacturer	Dreame
Model	Aqua10 Ultra Track Complete
Battery capacity	6,400 mAh
Suction power	25,000 Pa
Dust bin capacity	3.2 L
Water tank capacity	160 mL for clean water / 150 mL for dirty water
Run time	Up to 205 min (Quiet mode) / up to 114 min (Max mode)
Mopping function	Yes (mopping rollers)
Self-cleaning function	Yes
Navigation system	VersaLift DToF
Features	TrackSync™ mopping system, ProLeap™ system for avoiding obstacles and crossing thresholds up to 6 cm high (dual components), retractable legs, Triple-Wheel AgiLift™ chassis with three wheels, OmniSight™ AI Navigation with AI cameras
Filter type	HEPA
Compatibility	Dreamehome app, Amazon Alexa, Siri, Google Assistant
Docking station clean/dirty water tank capacity	4/3.5 L

Pojemność akumulatora: 6400, Water container capacity (l): 4, GPSR Link: https://psr-assets.innpro.pl/small_appliances/sg_small_appliances_vacuum_cleaners.pdf, Net weight: 18720, Box length: 57,00, Box width: 50,50, Box height: 55,50, Gross weight: 25460, Information about data generation: https://dataact.innpro.pl/dreame/6978515251986, test: Aqua10 Ultra Track Complete (czarny), PPWR: https://ppwr.innpro.pl/dreame, Operating time (min): 171 - 205 min, Suction power (Pa): 25 000, Rodzaj padów mopujących: Rolka mopująca, Funkcja samoczyszczenia: TAK

Techninė specifikacija

Konstrukcija	
Dulkių talpos tipas	Kombinuotas
Produkto spalva	Juoda
Dulkių rinkiklio tipas (pagrindas)	Dulkių maišas
Veikimo charakteristikos	
Drėgnas plovimas	Taip
Automatinis pagrindo apsisukimas	Taip
Bazinės stotelės funkcijos	Įkraunama
Dulkių kiekis (pagrindas)	3,2 L
Vandens bako talpa	4 L
Laiptų aptiktis	Taip
Šepečio tipas	Ritininis šepetys ir šoninis šepetys

Naršymo tipas	D-ToF lidar
Energijos valdymas	
Įkraunama	Taip
Svoris ir matmenys	
Skersmuo	35 cm
Aukštis	97,5 mm
Svoris	5,5 kg
Bazinės stoties matmenys (plotis x gylis x aukštis)	440 x 420 x 500 mm
Bazinės stoties svoris	10,9 kg
Pakuotės turinys	
Valymo šluostė	Taip
Instrukcija	Taip
Bazė komplekte	Taip
Greitos pradžios vadovas	Taip
Techninė informacija	
Vakuuminis	25 kPa
Matmenys ir svoris	
Matmenys (I × P × A)	57,00cm × 50,00cm × 55,00cm
Svoris	25,46kg
