Aprašymas

GEEKOM A5 Pro Ryzen 5 7530U Mini PC

The GEEKOM A5 Pro 2026 Edition is a Mini PC that combines a 6-core, 12-thread AMD Ryzen™ 5 7530U processor with 16 GB of RAM and a 1 TB SSD. The processor operates at a clock speed ranging from 2.0 GHz to a maximum of 4.5 GHz, allowing the computer to efficiently handle multitasking, office applications, web browsing, and video conferencing. The entire unit is housed in an aluminum chassis measuring approximately 112 × 112 × 37 mm with a volume of 0.47 L—the device takes up very little space on a desk, and thanks to its VESA mount, it can also be mounted behind a monitor. Windows 11 Pro comes pre-installed, allowing you to get to work almost immediately after booting up.

Ryzen 5 7530U – 6 cores for smooth performance

The GEEKOM A5 Pro's performance is powered by the AMD Ryzen™ 5 7530U processor with Zen 3 architecture, featuring 6 cores, 12 threads, and 16 MB of cache. A maximum clock speed of up to 4.5 GHz ensures adequate responsiveness when working with multiple applications simultaneously, creating documents, browsing the web, or conducting video calls. The computer can also be used with cloud-based AI services and agents, for example, to draft texts, create summaries, conduct research, plan, or handle repetitive tasks. Graphics are handled by the integrated AMD Radeon™ Graphics chip, eliminating the need for a separate graphics card.

16 GB of RAM and a 1 TB SSD with expandable storage

In the A5 Pro configuration offered here, you get 16 GB of DDR4 SO-DIMM memory and a 1 TB SSD, which provides ample capacity for both everyday work and storing a large number of documents, applications, and multimedia files. Two SO-DIMM slots allow you to increase the amount of RAM up to 64 GB, so you can upgrade the computer over time to handle more demanding tasks. There are also two storage slots available — an M.2 2280 PCIe Gen 4 x4 slot supporting SSDs up to 2 TB and an M.2 2242 SATA 3.0 slot for a drive with a capacity of up to 1 TB, enabling a total of up to 3 TB of storage space.

Support for up to four monitors and 8K resolution

Extensive display capabilities make it easy to set up a comfortable, multi-monitor workstation. Two HDMI 2.0 ports and two USB 3.2 Gen 2 Type-C ports allow you to connect up to four displays simultaneously or a single 8K screen. This means you can keep spreadsheets, a web browser, a messaging app, a data panel, or a video conference window open on separate monitors—without having to constantly switch between applications.

A full set of ports without a tangle of adapters

The GEEKOM A5 Pro offers a wide selection of ports, making it easy to connect the devices you need. You'll have three USB-A 3.2 Gen 2 ports, two USB-C 3.2 Gen 2 ports, one USB-A 2.0 port, two HDMI 2.0 ports, a 3.5 mm headphone jack, an SD card reader, and a 2.5G RJ45 Ethernet port. This means you can conveniently connect a monitor, printer, scanner, external storage, game controller, projector, speakers, or NAS server to the computer, among other devices. A Kensington Lock slot is also available, providing an additional layer of security for your computer.

Wi-Fi 6, Bluetooth 5.2, and High-Speed Wired Networking

Wi-Fi 6 and Bluetooth 5.2 are used for wireless communication. This allows you to use the network without the need for additional cables and conveniently connect the computer to compatible keyboards, mice, headphones, and other devices. If a wired connection is your priority, the 2.5G RJ45 port provides access to a high-speed wired network, which is useful for tasks such as transferring large files and working with network resources. The antenna technology used is designed to minimize interference and maintain a stable signal even through walls.

IceBlast 3.0 – Effective Cooling and Less Noise

The GEEKOM IceBlast 3.0 cooling system uses intelligent fan control, two copper heat pipes, and heat-dissipating fins to efficiently respond to the computer's changing workload. This helps maintain optimal component temperatures during extended use while minimizing unnecessary noise and power consumption. Under full load, the noise level remains below 30 dB, ensuring a comfortable working environment even during more demanding tasks.

Aluminum Construction

The chassis is made of an aluminum alloy that can withstand pressure of up to 200 kg and enhances the structure's resistance to damage. The computer has undergone 339 quality tests and over 5 years of stability testing, including, among other things, 120 hours of operation at temperatures ranging from -20°C to 55°C, 90 minutes of vibration testing, 15,000 USB connection cycles, and 330 hours of operation under heavy load. The motherboard features MPS chips and 150 µF tantalum capacitors at the USB ports, which support a stable power supply to connected devices. Additional stability is provided by precision-molded, non-slip high-density silicone components.

A compact computer that fits easily into your workspace

Measuring approximately 112 × 112 × 37 mm, the case weighs about 652 g and has a volume of just 0.47 L, making the A5 Pro ideal for spaces where space-saving is a priority. The included VESA mount allows you to mount the computer behind your monitor, reducing the number of devices visible on your desk and making it easier to keep your workspace organized.

Windows 11 Pro and Linux Support

The GEEKOM A5 Pro 2026 Edition comes with Windows 11 Pro pre-installed, so you can start working right away after basic setup. The computer also supports popular Linux distributions, including Ubuntu and Fedora, allowing you to customize the environment for home, office, or more specialized uses. The user-friendly BIOS interface makes system configuration easy.

Included

- GEEKOM A5 Pro Mini PC
- VESA mount
- Power supply
- HDMI cable
- User manual

Manufacturer	GEEKOM
Model	A5 Pro
Dimensions	112 × 112 × 37 mm
Weight	Approximately 652 g
Processor	AMD Ryzen™ 5 7530U (6 cores, 12 threads, 16 MB cache, 2.0–4.5 GHz)
Graphics card	AMD Radeon™ Graphics
RAM	DDR4 SO-DIMM, up to 64 GB
Storage	1 × M.2 2280 PCIe Gen 4 x4 SSD (up to 2 TB) 1 × M.2 2242 SATA 3.0 SSD (up to 1 TB)
I/O Ports	3 × USB 3.2 Gen 2 Type-A 2 × USB 3.2 Gen 2 Type-C 1 × USB 2.0 Type-A 2 × HDMI 2.0 1 × 3.5 mm headphone jack 1 × RJ45 2.5G LAN 1 × SD card reader 1 × DC input 1 × power button
Operating system	Windows 11 Pro
Bluetooth	Bluetooth 5.2
Wireless Connectivity	Wi-Fi 6
Kensington Lock	Yes
Power Adapter	65 W, 19V/3.42A
