The Vero L5 Bronze 600W is like a God Mode for you your PC.

It's a stable power supply with DC-DC converters to regulate voltages and deliver 500 W of continuous power. With Taiwanese Teapo electrolytic and aluminum-polymer capacitors inside, the Vero L5 Bronze 600W can operate at temperatures up to 105°C. No wonder this bad boy is 80 PLUS® Bronze certified.

The Vero L5 Bronze 600W is also protected against short circuits, system overloads and other mishaps. A quiet Stratus fan with FDB bearings keeps operating temperatures low. And with a chassis length of just 14 cm long, it can fit into a smaller PC too.
