Pagrindinės savybės

- ✓ Adjustable Switch Toggle for Tactile / Linear Press
- ✓ Rough-textured Volume Roller, Red/Blue Light Ring
- ✓ Full N-Key Rollover, 60M Keystroke Rated
- ✓ Per-key RGB Backlight, Predator QuarterMaster App

Aprašymas

Different game, different set of skills, and most likely, a different keypress. With the Predator Aethon 700 RGB mechanical gaming keyboard, you have twice the power in a single total package.

TACTILE? LINEAR? BOTH.

Quickly toggle between a tactile, clicky keypress or go all-out with optical for a press that’s linear, smooth, and a tad more silent. With the precise tracking of the optical sensor, the Aethon 700 registers and tracks actuation with complete precision.

SPIN TO WIN

Rotate the roller to immediately change volume without having to alt-tab or sift through pesky menus. The rough-textured roller spins into action with ease so you can stay focused while the always familiar, ever-helpful function keys make managing media an afterthought.

NEVER MISS A PRESS

In the heat of the moment, a single missed keypress can spell defeat. With full N-key rollover (and being 60 million keystroke rated), press as many keys (simultaneously if needed) for as long you like.

LIGHT IT UP—YOUR WAY

Take total control over lighting to the tune of 16.8 million colors with the option of customizing the backlight of each key. Afterwards, experiment with 7 preset lighting modes and alter them to your liking.

ELEGANCE WITH AN EDGE

Relish in the metallic touch of the anodized aluminum faceplate and the comfort of the detachable magnetic wrist rest.

SPEAK TO THE QUARTERMASTER

The Predator Aethon 700 is a programmable keyboard – so you can customize settings, such as lighting, macros and more via Predator Quartermaster.
