Aprašymas

SMALLRIG RA-S280A Lighting Tripod with a 280 cm Arm

The SmallRig RA-S280A is a lighting tripod with an arm, offering height adjustment from 94 to 280 cm and a maximum load capacity of 5 kg. The Air Cushion damping system slows the descent of the sections during adjustment, helping to protect both the mounted equipment and the user’s hands. The construction, made primarily of aluminum alloy and iron, ensures sufficient durability for everyday use, and the included arm—with an adjustable length ranging from 95 to 170 cm—allows you to conveniently position the light above the subject you’re photographing or filming.

Air Cushion for Safer Adjustment

The built-in Air Cushion system prevents individual tripod sections from dropping suddenly when the lock is released. This makes height adjustments smoother, reducing the risk of the mounted light suddenly striking the subject or accidentally pinching your hand. Quick-release flip locks allow for efficient unlocking, adjustment, and securing of the sections, which is particularly useful during frequent changes to the lighting setup.

Stable Construction for Various Applications

The tripod is made of durable materials, including aluminum alloy and iron, to ensure adequate rigidity while remaining easy to transport. When the legs are fully extended, the base width reaches approximately 1.2 m, which helps maintain stability while working with lighting. Non-slip, wear-resistant nylon feet improve grip on the ground, and the included weight bag provides additional stability to the structure.

Adjustable Boom Arm and Universal Mount

The included boom arm is adjustable from 95 to 170 cm, making it easy to position the light off-center from the tripod’s central axis—for example, above a product or model being photographed. This solution works well for portrait, product, and still life photography, as well as for recording interviews, live broadcasts, and content for online stores. The flat adapter with a 1/4"-20 thread, made of stainless steel, ensures broad compatibility with accessories and a secure connection, while its material enhances resistance to wear and corrosion.

Convenient Transport and Versatile Usage

When folded, the SmallRig RA-S280A is approximately 94 cm long, making it easier to transport between the studio and the shooting location. The tripod weighs 3 kg, striking a balance between stability and portability when working in various locations. The kit also includes a boom arm, a weight bag, a metal hook, and a stainless steel connector, making it easier to set up a complete lighting configuration.

Included

- SmallRig RA-S280A Air-Cushioned Light Stand
- Boom arm
- Weight bag
- Stainless steel connector
- Metal hook

Manufacturer	SmallRig
Model	RA-S280A
Maximum height	280 cm
Minimum height / length when folded	94 cm
Boom length	95–170 cm
Maximum load capacity	5 kg
Center column diameter	35 / 30 / 25 mm
Arm diameter	26 / 23 mm
Leg diameter	22 mm
Maximum leg spread	approximately 1.2 m
Mounting thread	1/4"-20
Weight	3 kg
Construction material	aluminum alloy and iron
Adapter material	stainless steel
Color	black
